This book is full of my personal successes and failures as a contractor and construction worker. It hasn't always been easy and for the most part, I made it harder than it needed to be, but you don't need to. Why should you repeat the same mistakes I made years ago? I would've paid five hundred dollars or more for the information inside this book when I started. Heck, I probably would've paid \$1000 for the information inside this book, ten or fifteen years into my

career. When I first started, I had problems dealing with my clients and other construction workers. After that, I had problems getting paid on time or getting paid period. Then I had to deal with the ultimate problem, either too much or not enough work. The challenges were often over whelming and I can't tell you how many times... I wanted to quit. I had to make a change and those changes led me to learn more about construction, business and psychology. The more I learned, the easier my job became and this motivated me to start learning about other things, which eventually made my job even easier. If you don't believe, you need to "Read to Succeed," you're going to remain stuck where you are...Forever! I was your average student in school who started a construction business at 25 years old, with less than \$1000 in the bank. Can You Believe That! It wasn't easy and I would have given practically anything to have the opportunity you have in front of you today. To benefit from the years of my experiecnce ... and for under fifty bucks... Come on this one is a no brainer. Education is the key to success my friend, so let's get started on your journey towards a better life as a successful contractor money making machine and personal development junkie! Wishing You The Best, Greg Vanden Berge

"Contractor Secrets Finally Revealed To The Public" For years I've

been threatening contractors to write a book like this and I finally did. Some of the contractors I've worked with in the past, don't want the information in this book to ever be revealed. Contractor secrets like these are usually taken to the grave and wouldn't ever be revealed. These secrets can provide property owners with valuable negotiating tools that contractor's desperately don't want you to have. You can't negotiate effectively, if you don't understand your opponent. In this book you'll learn how to negotiate effectively with contractors, compare estimates and find contractors. This book provides you with plenty of tips on how to sort through the professionals to find the real winners. Contractor's Personalities In recent years, human behavior and psychology have played an important role in construction job sales. Contractors like myself are starting to study and learn more about different personalities. Some of this information is priceless and if you're looking for a good contractor, you need to understand how to communicate and interact with them effectively. Hiring the wrong contractor isn't just going to cost you a lot of money or waste your time, it's going to create other problems that you might not be aware of. There's a section in this book that talks about conflicting personalities and how you can avoid dealing with them. If you're an arrogant person, there's a good chance that you're not going to get along with another arrogant

person. If you're someone who can't make decisions and you're not interested in someone forcing you to make them, you'll need to avoid hiring an aggressive contractor. Aggressive contractors can force their clients into accepting unnecessary change orders and creating a hostile working environment. In the book you'll find personalities that don't work well with other personalities and this by itself, could be worth 10 times the actual amount you're actually paying for this book.
