Developing a Water Management Program | Legionella | CDC

In paper 6, the practical issues of implementation are discussed in more detail. When developing peer worker posts, it is useful to think of four sequential phases. The first involves preparation – of the organisation as a whole, of the teams in which peers will be placed, and, perhaps most obviously, of the peers themselves.

Purpose: The purpose of this article is to offer practical guidance for pharmacists to successfully implement penicillin allergy skin testing (PAST). Summary: Less than 10% of patients labeled as having a penicillin allergy are confirmed as present upon skin testing. This labeling results in use of alternative antibiotics and thus unwanted adverse consequences including potentiated antimicrobial resistance, increased costs, and worse clinical outcomes.
