There are primary pollutants and secondary pollutants (Cooper & Alley, 838). Primary air pollutants sources are classified as the emissions which are released direct to the atmosphere through a process such as the carbon monoxide from a motor vehicle. The guiding principle in distinguishing the primary and secondary air pollution is the fact ...

Air pollution - Essay Master

In clear, authoritative language, the authors discuss the philosophy and procedures for the design of air pollution control systems. Their objective is twofold: to present detailed information on air pollution and its control, and to provide formal design training for engineering students.
