The suspension on Alfa's 145/146 is relatively simple with McPherson struts at the front and radius arms at the rear. The lower front wishbones (145/146 lower wishbone replacement guide) wear on the inner end at the front and this will often show up in worn inner edges of the front tyres. While

Alfa Romeo - 145 - Repair
Guide - (1997)

The front wing support rusts away from the bottom up. To help overcome this problem we are producing repair sections made from stainless steel. Ideally it would be welded in place but you could use rivets, nuts and bolt or even self tapping screws to hold it in place if you wanted to. The section is a copy of a 156 support but can be used on 155/146 and 145 models with little or no modification.
