In 1948, then newcomer James "Andy" Anderson, started his career as an arctic bush pilot with a sense of adventure and a year-old Taylorcraft plane with no starter, no generator and no battery. He didn't know he'd become a pioneer. Anderson went on to establish a post-World War II bush service to Alaska's vast Koyukuk River region, backed by Wien Airlines. After seventeen years and more than 32,000 hours of flight time, Anderson offers a unique and historic view of living and flying in Alaska. Arctic Bush Pilot captures the spirit of Alaska and her hearty people while capturing the drama and adventure of Arctic flying, all from the historic perspective of this pioneering pilot.

The true life story of Canadian Arctic bush pilot Don C. Braun is must reading for aviation fans everywhere. His fireside narrative plus 32 pages of photos capture the spirit and adventures of the first man to land a wheeled aircraft at the North Pole. Born on a farm near St. Cloud, Minnesota, in 1913, Don built and flew a glider as a teenager and then operated an aircraft repair shop at Harlem Airport in Chicago in the 1930's. He joined the Royal Canadian Air Force in 1941 and flew the North West Staging Route from Edmonton to Alaska. His first bush flying was in an RCAF Norseman during the war years, and he went on to become one of the best known and most respected Canadian Arctic bush pilots of his time. He joined with Max Ward in getting Wardair off the ground as a small charter operation out of Yellowknife in the 1950's. While Max grew Wardair into one of the world's premier charter airlines, Don preferred the cockpit and the North. His stories of close calls and life in the North always spoke his mind, and this handsome book does no less. The Arctic Fox, as he was known in the North, was superbly resourceful, bailing himself out of tight situations almost daily in his days of High Arctic flying. A great pilot and an even better mechanic, Don shares details aviation fans will know and love. This is your book, pilots and all others who love flying.

This is the best book ever written about Alaskan bush pilots. Helmericks has been a pilot in Alaska since 1946 and is a master guide with the Alaska Game Commission. A born storyteller, he describes flying blind through fogged-in mountain passes, landing by pontoon on remote glaciers, and setting down on lonely sandbars. This book is an important document of Alaskan history and a thrill for any hunter, fisherman, or pilot.

Missionary to the Anaktuvuk Eskimos, 1958-64.

Backed by Wien Airlines, former Navy combat pilot "Andy" Anderson pioneered post-World War II bush service to Alaska's vast Koyukuk River region serving miners, Natives, sportsmen, geologists, adventurers, and assorted bush rats. He flew mining equipment, gold, live wolves and sled dogs, you name it--anything needed for life in the bush. He sweated out dozens of dangerous medical-emergency flights, "always at night and in terrible storms." Illustrated with 50 historical photos and co-authored by one of Alaska's most popular writers, ARCTIC BUSH PILOT is an exciting and sometimes nostalgic account of a pioneer pilot and his special place in Alaska aviation history.

Color-illustrated, Bush Pilot Way, focuses on flying small taildragger aircraft and landing them in remote and challenging terrain in wild Alaska. It presents the author's explanation of his aviation journey in Alaska. The journey displays the inspiration of flying in Alaska, defining who are Alaska's modern-day bush pilots, and showing the training necessary to become the best pilot you can be. It also presents the causes for the elevated aircraft accident rate in Alaska and how to avoid such incidences. Bush Pilot Way serves as a primer for training the Alaska bush pilot way. Once a pilot learns how to train according to the book, additional or new training can be carried out, without difficulty, because the pilot has already learned the foundation for training. Bush Pilot Way is a classical training manual because it is written in a contemporary style that is always current. As time goes forward, the strategy for training will remain the same. Fifty-two distinctive narratives comprising the appendix,

show general aviation topics and authenticated experiences of a skilled pilot flying Alaska's uninhabited backcountry. The narratives include the inspiration of flying Alaska's coastal mountains, glaciers, and fjords; flying and landing in Alaska's backcountry in winter on skis and in summer on Bushwheels; flying wildlife surveys and observing rare wildlife encounters.
