With over 60,000 copies in print since its original publication in 1984, Ethics has served numerous generations of students as a classic introduction to philosophical ethics from a Christian perspective. Over the years the philosophical landscape has changed somewhat, and in this new edition Arthur Holmes adjusts the argument and information throughout, completely rewriting the earlier chapter on virtue ethics and adding a new chapter on the moral agent. The book addresses the questions: What is good? What is right? How can we know? In doing so it also surveys a variety of approaches to ethics, including cultural relativism, emotivism, ethical egoism and utilitarianism--all with an acknowledgment of the new postmodern environment.

The Workbook actively involves students in the text material, using a variety of engaging exercises and self-tests. It helps students organize their studies, take better notes, identify areas for improvement, and be better prepared for examinations.

Never HIGHLIGHT a Book Again! Virtually all testable terms, concepts, persons, places, and events are included. Cram101 Textbook Outlines gives all of the outlines, highlights, notes for your textbook with optional online practice tests. Only Cram101 Outlines are Textbook Specific. Cram101 is NOT the Textbook.
