This is the solutions to the exercises of chapter 4 of the excellent book "Introduction to Statistical Learning". over 5 years ago Introduction to Statistical Learning - Chap3 Solutions

RPubs

Welcome to my page of solutions to "Introduction to Algorithms" by Cormen, Leiserson, Rivest, and Stein. It was typeset using the LaTeX language, with most diagrams done using Tikz. It is nearly complete (and over 500 pages total!!), there were a few problems that proved some combination of more difficult and less interesting on the initial pass, so they are not yet completed.

7. Over the course of a recent semester, data were collected on the region-of-origin for the 40 graduate students enrolled in a statistics class: 15 are from China, 4 are from Europe, 10 are from India, 3 are from Latin America, and 8 are from the US.

Chapter 4: Introduction to Probability | Online Resources

Points B ($x_1 = 2$, $x_2 = 4$) and C ($x_1 = 4$, $x_2 = 3$) are the alternate optimal solutions, each with a profit of \$3,000. The feasible solution space will change. The new constraint line, $3x_1 + 4x_2 = 20$, is parallel to the existing objective function. Thus, multiple optimal solutions will also be present in this scenario.
