Experiments Manual Nelson~~  
Description. Prepared by John H.  
Nelson and Kenneth C. Kemp, both  
of the University of Nevada. This  
manual contains 43 finely tuned  
experiments chosen to introduce  
students to basic lab techniques  
and to illustrate core chemical  
principles. You can also customize  
these labs through Catalyst, our  
custom database program.

Put 1 measure (look at note 5 opposite) of sodium sulphate into a clean dry test tube and add about 2cm of water. Gently shake the tube. Roughly time how long it takes for the sodium sulphate to dissolve. Repeat the experiment but this time gently shake the tube in the burner flame to warm (not boil) the water.

## ~~Chemistry Laboratory Experiments Manual Nelson~~

The sequence of experiments in this Laboratory Manual is designed to follow the lecture curriculum. However, instructors will sometimes vary the order of material covered in lecture and thus certain experiments may come before the concepts illustrated are covered in lecture or after the material has been covered.

book to any student taking the first laboratory course in organic chemistry. The Organic Chem Lab Survival Manual is filled with explanations of necessary techniques in much the same way that advanced techniques have been presented in books by Wiberg, Lowenthal, Newman, and Gordon and Ford. In larger universities, The Survival Manual is a valuable supplement to most laboratory manuals. It provides explanations that many graduate
