Cognitive Gadgets The Cultural Evolution

Cognitive gadgets are products of cultural evolution, rather than genetic evolution. At birth, the minds of human babies are only subtly different from the minds of newborn chimpanzees. We are friendlier, our attention is drawn to different things, and we have a capacity to learn and remember that outstrips the abilities of newborn chimpanzees.

Cognitive Gadgets: The Cultural Evolution of Thinking ...

Distinctively human cognitive processes are products of cultural group selection. They are not cognitive instincts, but cognitive gadgets. On the cognitive gadgets view, rather than taxing an outdated mind, new technologies - social media, robotics, virtual reality - merely provide the stimulus for further cultural evolution of the human mind.'

Cognitive Gadgets: The Cultural Evolution of Thinking by ...

Cognitive gadgets are products of cultural evolution, rather than genetic evolution. At birth, the minds of human babies are only subtly different from the minds of newborn chimpanzees. We are friendlier, our attention is drawn to different things, and we have a capacity to learn and remember that outstrips the abilities of newborn chimpanzees.

Cognitive Gadgets □ Cecilia Heyes | Harvard University Press

Cognitive gadgets are distinctively human cognitive mechanisms □ such as imitation, mind reading, and language □ that have been shaped by cultural rather than genetic evolution. New gadgets emerge, not by genetic mutation, but by innovations in cognitive development; they are specialised cognitive mechanisms built by general cognitive mechanisms using information from the sociocultural environment.

Brain Science with Ginger Campbell, MD: Neuroscience for ...

Through lucid, compelling writing, this masterly exegesis proposes that the key features of the human mind, termed "cognitive gadgets," are the products of cultural rather than genetic evolution. It will stimulate its readers to think deeply, as Heyes has done, about what it means to be human. —Lord John Krebs, University of Oxford

Cognitive Gadgets – Cecilia Heyes | Harvard University Press

Evidence of cultural influences on cognition is accumulating, but untangling these cultural influences from one another or from non-cultural influences has remained a challenging task. As between-group differences are neither a sufficient nor a necessary indicator of cultural impact, cross-cultural comparisons in isolation are
