In this emerging global community, comparative analysis of criminal justice is important for gaining an understanding of the complex values that define conceptions of justice across the globe. This book takes a holistic approach to comparative analyses by examining individual processes as a means to highlight differences among systems, while simultaneously exploring and illustrating the historical and procedural contexts that explain why those differences occur."--Résumé de l'éditeur.

This Handbook presents innovative research that compares different criminal procedure systems by focusing on the mechanisms by which legal systems seek to avoid error, protect rights, ground their legitimacy, expand lay participation in the criminal process and develop alternatives to criminal trials, such as plea bargaining, as well as alternatives to the criminal process as a whole, such as intelligence operations. The criminal procedures examined in this book include those of the United States, Germany, France, Spain, Russia, India, Latin America, Taiwan and Japan, among others.

The Oxford Handbook of Criminal Process surveys the topics and issues in the field of criminal process, including the laws, institutions, and practices of the criminal justice administration. The process begins with arrests or with crime investigation such as searches for evidence. It continues through trial or some alternative form of adjudication such as plea bargaining that may lead to conviction and punishment, and it includes post-conviction events such as appeals and various procedures for addressing miscarriages of justice. Across more than 40 chapters, this Handbook provides a descriptive overview of the subject sufficient to serve as a durable reference source, and more importantly to offer contemporary critical or analytical perspectives on those subjects by leading scholars in the field. Topics covered include history, procedure, investigation, prosecution, evidence, adjudication, and appeal.

"As in the first edition, Thaman presents a topical approach to the subject, focusing on the roles of public prosecutors, police, victims, and defense attorneys in the investigation of criminal cases and trials up through the judgment phase. Thaman uses high court jurisprudence in English translation to elucidate the European approach to important, and often controversial, areas of criminal procedure, and he also links criminal procedure with its roots in substantive criminal law. Thaman looks at the early reactions to crimes committed flagrantly or in secret as the historical roots of modern criminal procedure. The approaches of the old inquisitorial system and the use of torture to solve circumstantial evidence crimes are also presented.The Second Edition retains the basic content and organization of the original edition. It updates the citations to U.S. Supreme Court cases and to important literature which has appeared in the last six years and refers to some new important cases, primarily in footnotes. Stylistic improvements in the text and the translations have been made and glossary entries (including some Russian

terms) have been added."

This book aims to honour the work of Professor Mirjan Damaška, Sterling Professor of Law at Yale Law School and a prominent authority for many years in the fields of comparative law, procedural law, evidence, international criminal law and Continental legal history. Professor Damaška 's work is renowned for providing new frameworks for understanding different legal traditions. To celebrate the depth and richness of his work and discuss its implications for the future, the editors have brought together an impressive range of leading scholars from different jurisdictions in the fields of comparative and international law, evidence and criminal law and procedure. Using Professor Damaška's work as a backdrop, the essays make a substantial contribution to the development of comparative law, procedure and evidence. After an introduction by the editors and a tribute by Harold Koh, Dean of Yale Law School, the book is divided into four parts. The first part considers contemporary trends in national criminal procedure, examining cross-fertilisation and the extent to which these trends are resulting in converging practices across national jurisdictions. The second part explores the epistemological environment of rules of evidence and procedure. The third part analyses human rights standards and the phenomenon of hybridisation in transnational and international criminal law. The final part of the book assesses Professor Damaška 's contribution to comparative law and the challenges faced by comparative law in the twenty first century.
