I. 1947 – 1959: Options after Independence, the Evolution of Contemporary Indian Architecture. Independence in 1947 brought forth a bewildering range of problems, opportunities, expectations and dreams. The partition of the country caused a refugee problem that involved millions of families. All eyes were on a newly formed people and its leaders as the nation settled down to doing what had to be done to set the wheels of development in motion.

After the Indus Valley Civilization, there are few traces of Indian architecture, which probably mostly used wood, or brick which has been recycled, until around the time of the Maurya Empire, from 322 to 185 BCE. From this period for several centuries onwards, much the best remains are of Indian rock-cut architecture, mostly Buddhist, and there are also a number of Buddhist images that give ...

Contemporary Architecture (1950-1960) Indian Context

Modern Indian Architecture. Immediately after the independence of India, the Modernism swept through the new buildings constructed to meet the new needs such as for schools, government buildings, housing for the poor, urban renewal, and new capital cities of various states. Collaboration with internationally renowned architects created distinctive design innovations that blended modernist and Indian style.

ARCHITECTURE AND CONTEMPORARY INDIAN IDENTITY

The development of Modernist architecture in India. September 26, 2011 Sreekanth P S. The concept of "Modernism" in 20th century Indian architectural development remains difficult to grasp, as it was used within numerous stylistic developments, following the spirit of the day. Starting with the efforts made by Europeans in the 1920s, the idea of "modern architecture" as a revolutionary and innovative force started to make cautious headway in India in the early 1930s.

The development of Modernist architecture in India – The ...

Contemporary Indian art matches the cultural and ideological diversity of the nation, and thanks to rapid globalization is becoming increasingly visible in the international art world. Subodh Gupta 's often-monumental installations link the realities of life in northern India with the broader forces of urbanization and globalization, while Zarina makes intimate works on paper that engage with the violent partition of India and Pakistan, as well as her own dislocation from home.

Contemporary Indian Art | Artsy

Uttam C. Jain who succeeded to this trend is developing an architecture taking root on arid land in the desert district in western India. Indian contemporary architecture spreads between these two reaches: globalism tightly connected with Europe and the U.S.A. and regionalism deeply based on the Indian earth.

INDIAN ARCHITECTURE Introduction □ The architecture of India includes present day India, Pakistan, Bangladesh and Sri Lanka. □ These countries later on got separated by political boundaries but, still share a common cultural heritage. □ The diversity of Indian culture is represented in its architecture. □ Indian architecture comprises a blend of ancient and varied native traditions, with building types, forms and technologies from west, central Asia, and Europe. 2

history of indian architecture - SlideShare

Today, it would be a mistake to interpret contemporary Indian architecture as a surrender to pure Western modernism. Indian architecture, as it evolved during the 70's and beyond, is the synthesis of external influences and internal explorations and innovations. This spirit could be best summarized in the words of Nehru:

Development of Modern Indian Architecture

The State of Architecture, as it was known, sought to put contemporary Indian building in the spotlight in order to map trends post-independence and, more importantly, provoke a conversation both ...

India is a lively and diverse country that in recent years has developed into one of the largest industrialized nations in the world. This process is also reflected in its architecture. Recent developments betray a new consciousness and the search for an Indian identity. International influences are merging with traditional styles to create a unique new architectural language, which also bears the stamp of Le Corbusier and Louis Kahn, who worked there. In its introduction, the book depicts the rise of modern architecture in India since independence in 1947. The main section describes the important tendencies of contemporary Indian architecture in thematic chapters, each with built examples. In

addition to the new younger generation of Indian architects, it also considers the first post-independence generation, including Balkrishna Doshi and Charles Correa.

"The Anthology of Contemporary Indian Architecture showcases emerging and established talent in the field of Indian architecture during the last two decades. While the original masters of classic modern architecture in modern India do feature in this book, The Anthology of Contemporary Indian Architecture devotes itself to the cutting-edge, unique and contemporary designs and monumental creations, ranging from residential and commercial to public spaces, which are putting Indian architects on the world map for architectural excellence."--Publisher website.

A place of astonishing contrasts, India is home to some of the world's most ancient architectures as well as some of its most modern. It was the focus of some of the most important works created by Le Corbusier and Louis Kahn, among other lesser-known masters, and it is regarded by many as one of the key sites of mid-twentieth century architectural design. As Peter Scriver and Amit Srivastava show in this book, however, India's history of modern architecture began long before the nation's independence as a modern state in 1947. Going back to the nineteenth century, Scriver and Srivastava look at the beginnings of modernism in colonial India and the ways that public works and patronage fostered new design practices that directly challenged the social order and values invested in the building traditions of the past. They then trace how India's architecture embodies the dramatic shifts in Indian society and culture during the last century. Making sense of a broad range of sources, from private papers and photographic collections to the extensive records of the Indian Public Works Department, they provide the most rounded account of modern architecture in India that has yet been available.

The field of architecture has gradually evolved from being a mere profession to becoming a representation of the society in which we live. Architects form the voice of this profession, and an in-depth discussion with them allows a greater understanding of their theories, visions for architecture, and contributions towards the field, and how they are managing the non-linear societal evolution in a comprehensive manner. This volume brings together 17 iconic Indian architects across generations, and, through dialogues, probes into their lives, beliefs and philosophies, and candid thoughts and opinions. It offers a platform for discussions on the core issues of architecture, and serves as a reference for the state of architecture both in India and globally. The book will appeal to architectural and building industry practitioners and students of architecture, as well as the general reader, as it speaks about architecture as an integral part of building a nation. It traverses the architecture journey in India, and bestows a clarity on the directions still to be taken.

In Lucid Language That Speaks To Laymen And Architects Alike, This Book Provides A History Of Twentieth Century Architecture In India. It Examines In Detail The Early Influences On Indian Architecture Both Of Movements Like The Bauhaus As Well As Prominent Individuals Like Habib Rehman, Jawaharlal Nehru, Frank Lloyd Wright And Le Corbusier.

Contemporary Indian Houses discusses fifty-one architect-designed built-up houses selected from different parts of India. They display the diversity of needs, tastes and building materials in the context of different weather conditions and social trends. Different architectural appearances or external expressions have determined the classification of the houses into five sections. This grouping keeps the reader's growing interest in the external aspect of a residential structure. The emphasis is on the built-form rather than on the interior and its decor. Each house is accompanied by an explanatory text and supplemented by appropriate drawings and photographs to present a comprehensive picture of India's many-splendoured domestic architecture. Contemporary Indian Houses is a well illustrated document of changing trends in architectural tune. It is not only a reflection of contemporary Indian architecture but also source of reference material for architecture historians. Moreover, it fulfills the needs of architects and other professionals engaged in house construction activity along with those general readers who wish to keep themselves informed of what is happening in the field of creative design.

As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today, this book reveals a history that is largely unknown, not only in the West, but also in India. Educated in the 1930s and 1940s, the very first women architects designed everything from factories to museums in the post-independence period. The generations that followed are now responsible for metro systems, shopping malls, corporate headquarters, and IT campuses for a global India. But they also design schools, cultural centers, religious pilgrimage hotels, and wildlife sanctuaries. Pioneers in conserving historic buildings, these women also sustain and resurrect traditional crafts and materials, empower rural and marginalized communities, and create ecologically sustainable architectures for India. Today, although women make up a majority in India's ever-increasing schools of architecture, it is still not easy for them, like their Western sisters, to find their place in the profession. Recounting the work and lives of Indian women as not only architects, but also builders and clients, opens a new window onto the complexities of feminism, modernism, and design practice in India and beyond. Set in the design centers of Mumbai and Delhi, this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers. The diversity of practices represented here helps us to imagine other ways to create and build apart from "starchitecture." And how these women negotiate tradition and modernity at work and at home is crucial for understanding gender and modern architecture in a more global and less Eurocentric context. In a country where female emancipation was important for narratives of the independence movement and the new nation-state, feminism was, nonetheless, eschewed as divisive and

damaging to the nationalist cause. Class, caste, tradition, and family restricted—but also created—opportunities for the very first women architects in India, just as they do now for the growing number of young women professionals today.
