Current Concepts On Pathogenesis Of

Current concepts on the pathogenesis of the antiphospholipid syndrome Bill Giannakopoulos, Bill Giannakopoulos 1 Department of Immunology, Allergy and Infectious Diseases, Department of Medicine, University of New South Wales, St George Hospital, Kogarah, Sydney, Australia;

Current concepts on the pathogenesis of the ...

Current concepts of the pathogenesis of the acute coronary syndromes. Current concepts of the pathogenesis of the acute coronary syndromes Circulation. 2001 Jul 17;104(3):365-72. doi: 10.1161/01.cir.104.3.365. Author P Libby 1 Affiliation 1 Leducq Center for Cardiovascular ...

Current concepts of the pathogenesis of the acute coronary ...

This article aims to give an overview of the current literature focussing on pathognomonic aspects of osteomyelitis because of microbial invasion. Recent findings: Outlining the chronological sequence of osteomyelitis originating from the invasion of microbes finally leading to destruction of bone tissue, the formation and proliferation of biofilm structures play a key role in the development of inflammatory bone disorders.

Current concepts in pathogenesis of acute and chronic ...

Abstract. Acne is a disease of pilosebaceous inflammation. Pivotal in pathogenesis are the roles of hormones (insulin, insulin-like growth factor-1, androgens), Propionibacterium acnes, lipogenesis, and a proinflammatory lipid profile. Innate immune responses are induced through interaction with toll-like receptors and inflammasome activation initially and subsequently through adaptive immune activation.

Current Concepts in Acne Pathogenesis: Pathways to ...

Current concepts in pathogenesis of acute and chronic. osteomyelitis. Beck-Broichsitter, Benedicta E.; Smeets, Ralf; Heiland, Max. Author Information. Department of Oral and Maxillofacial Surgery, University Medical Center Hamburg-Eppendorf, Martinistra ß e, Hamburg, Germany. Correspondence to Benedicta E. Beck-Broichsitter, MD, DMD, Research Assistant, Department of Oral and Maxillofacial Surgery, University Medical Center Hamburg-Eppendorf, Martinistra ß e 52, Campus Forschung Geb ä ude N27 ...

Current Concepts in the Pathogenesis of Age-Related Macular Degeneration. Marco A. Zarbin, MD, PhD. Author Affiliations Article Information. From the Institute of Ophthalmology and Visual Science at the New JerseyMedical School, University of Medicine and Dentistry of New Jersey, Newark.The author has no relevant financial interest in this ...

Current Concepts in the Pathogenesis of Age-Related ...

Lung infection is caused by respiratory bacterial and fungal pathogens, including Pseudomonas aeruginosa, Haemophilus, Aspergillus fumigatus, and nontuberculous mycobacteria. Recent studies have highlighted the relationship between the lung microbiota and microbial-pathogen niches.

Bronchiectasis: Current Concepts in Pathogenesis ...

This review discusses the history and the classification of the disorder, the current theories of pathogenesis, and the advanced imaging modalities used in the diagnosis. The intramedullary pulse pressure theory (a new pathophysiologic concept of syringomyelia) also is presented. In addition, the current understanding of the painful

Syringomyelia: Current Concepts in Pathogenesis, Diagnosis ...

Increased understanding of the pathogenesis of OA from reactive chemical sensitizers is leading to development of better diagnostic testing and also an understanding of why testing for sensitization to such agents can be problematic. Risk factors for OA including possible genetic factors are being delineated better.

Occupational asthma: Current concepts in pathogenesis ...

Similarly, rapid progress has been made towards dissecting cellular and molecular pathways of inflammation that contribute to disease pathogenesis. This short review presents current pathogenic concepts that have emerged from genetic, genomic, and cellular information obtained in basic studies and from clinical studies of selective immune targeting drugs.

Psoriasis pathophysiology: current concepts of ...

" Hypersensitivity Pneumonitis: Current Concepts of Pathogenesis and Potential Targets for Treatment." American Journal of Respiratory and Critical Care Medicine , 200(3), pp. 301 – 308 Correspondence and requests for reprints should be addressed to Ganesh Raghu, M.D., Center for Interstitial Lung Diseases, University of Washington Medical Center, 1959 Northeast Pacific, Campus Box 356175 ...

Dialysis disequilibrium syndrome: current concepts on pathogenesis and prevention. Dialysis disequilibrium syndrome: current concepts on pathogenesis and prevention Kidney Int. 1994 Mar;45(3):629-35. doi: 10.1038/ki.1994.84. Author A I Arieff. PMID: 8196263 DOI: 10.1038/ki ...

Dialysis disequilibrium syndrome: current concepts on ...

Nonalcoholic fatty liver disease (NAFLD) is an increasingly recognized cause of chronic liver disease, representing the leading cause of hepatology referral in some centres. However, its pathophysiology is not completely understood. Insulin resistance is one of the major mechanisms involved in disease prevalence and progression.

Current concepts in the pathogenesis of nonalcoholic fatty ...

Current findings establish the importance of qualitative aspects of plaques as decisive determinants of their propensity to cause acute complications. Among these functional features of plaques associated with vulnerability, inflammation has emerged as a leading pathophysiologic mechanism, providing new potential therapeutic targets and novel avenues to risk assessment.

Current Concepts of the Pathogenesis of the Acute Coronary ...

Abstract Bronchiectasis is a disorder of persistent lung inflammation and recurrent infection, defined by a common pathological end point: irreversible bronchial dilatation arrived at through diverse etiologies. This suggests an interplay between immunogenetic susceptibility, immune dysregulation, bacterial infection, and lung damage.

Bronchiectasis: Current Concepts in Pathogenesis ...

As environmental partners to genetics, recent attention has focused on the roles of microbiota and biomechanical stress in initiating and perpetuating inflammation. Herein, we review these current...

Insight into the molecular mechanisms underpinning CeD pathogenesis provide several opportunities for novel therapeutics development and a range of pharmaceuticals are currently being assessed in pre-clinical and clinical trials (Table 3). These can be broadly classified into luminal approaches that aim to quantitatively reduce the load of gluten available to trigger the immune response and qualitative approaches that aim to induce gluten tolerance.
