It began with a weekend house; then weekend trips. Then the occasional meeting rearranged in favor of a morning in Central Park, just while the spring migration was on. Before Luke Dempsey knew it, he had spiraled down into full-on birding mania - finding himself riding along with two like-minded maniacs in a series of disreputable rental cars and even nastier motel rooms,

charging madly around the country in search of its rarest and most beautiful birds. A Supremely Bad Idea is the story of that search, and those birds, and those maniacs, and that country, and (to a much lesser extent) those rental cars. In Texas, the three obsessives go in search of the deeply endangered Golden-cheeked Warbler, which lives on the side of a hill near a waterfall; in Michigan, they see the pretty-much-extinct Kirtland's Warbler, which insists on short pine trees for nesting and lots of "quiet, please"; in Arizona, they see the very private Elegant Trogon after a very public fight with a birding guide. Along the way, Dempsey narrates an amazing sequence of encounters with nature and humanity, including a man building a

40-foot ark in his Seattle backyard; a beautiful woman who shows him how to kill 4,000 Cowbirds a year; a coyote (and his human smuggler) on the Rio Grande; and everywhere, these incandescent birds flitting across the range of his binoculars, and his heart. With the casual erudition of a Bill Bryson and the comic timing of a British David Sedaris, Dempsey demonstrates why so many millions of birders care so much about birds - and why, perhaps, the rest of us should, too.

Crown, we meet one of history's alleged villains through the eyes of a captivating new heroine -- the woman who was the mother of his illegitimate children, a woman who loved him for who he really was, no matter what the cost to herself. As Kate Haute moves from her peasant roots to the luxurious palaces of England, her path is inextricably intertwined with that of Richard, Duke of Gloucester, later King Richard III. Although they could never marry, their young passion grows into a love that sustains them through war, personal tragedy, and the dangerous heights of political triumph. Anne Easter Smith's impeccable research provides the backbone of an engrossing and vibrant debut from a major new historical novelist.

International Debt Statistics (IDS) 2016 (formerly Global Development Finance) provides statistical tables showing the external debt of 125 developing countries that report public and publicly guaranteed external debt to the World Bank's Debtor Reporting System (DRS). It

also includes tables of key debt ratios for individual reporting countries and the composition of external debt stocks and flows for individual reporting countries and regional and income groups, along with some graphical presentations. IDS 2016 draws on a database maintained by the World Bank External Debt (WBXD) system. Longer time series and more detailed data are available from the World Bank open databases, which contain more than 200 time series indicators, covering the years 1970 to 2014 for most reporting countries, and pipeline data for scheduled debt service payments on existing commitments to 2020. <|> The Everyday of Memory explores manifestations of the communist past in the everyday lives of Eastern Europeans today. Representing a wide range of disciplines including cultural studies, film

studies, urban studies, sociology, media, literature and art, the contributors to this book question the myth of a homogeneous Eastern European identity (as opposed to its historical Western counterpart). At the same time, they insist that those who experienced communism have a 'right to remember', and that their memories offer an alternative to the project of globalizing capitalism.
 The volume presents a critique of the current withdrawal of Eastern European politics from discussion of the communist past, in which the latter tends to be regarded as an obstacle to the neoliberal transition to democracy. As the book's microstudies of the everyday life of memory show, communism has never been isolated from its capitalist

nemesis: the two systems have been intertwined in the post-Enlightenment interplay of the humanist ideals that underpin the modernist project. Through a close observation of the unconstrained ways in which memory works, this book offers an insight into the paradoxes of the two ideological powers which posited the subservient <l>homo sovieticus against the civilized <l>homo economicus. The book also invites debate about the contemporary relevance of the ideological polarization of communism and capitalism.

Some of her fellow prisoners are far from innocent, and a guard confides that he's also been kidnapped and forced to play a role. The problem is that the warden controls the compound with an iron grip. Her only chance of escape could put her and the other inmates in grave danger...
