This means that the operator must select the ceiling projection option on the projector, and do it with the remote control, because the manual operation ... of Arts cum laude in journalism from ...

How to Use an Epson Ceiling Mount Projector

Additionally, they will find viable solutions for disassembly, reuse, de-manufacturing, upcycling, and other regenerative processes. "Waste is a colonial construct. In nature, there isn't such a ...

The story of Compaq is well-known: Three ex-Texas Instruments managers founded Compaq with modest venture funding. Just four years later, Compaq was on the Fortune 500 list, and, two years after that, they had exceeded $1 billion in annual revenue. No company had ever achieved these milestones so rapidly. But few know the story behind the story. In 1982, when Compaq was founded, there was no software standardization, so every brand of personal computer required its own unique application software. Just eight years later, compatibility with the open PC standard had become ubiquitous, and it has continued to be for over two decades. This didn't happen by accident. Cofounder and then CEO Rod Canion and his team made a series of risky and daring decisions—often facing criticism and incredulity—that allowed the open PC standard marketplace to thrive and the incredible benefits of open computing to be realized. A never-before-published insider account of Compaq's extraordinary strategies and decisions, Open provides valuable lessons in leadership in times of crisis, management decision-making under the pressure of extraordinary growth, and the power of a unique, pervasive culture. Open tells the incredible story of Compaq's meteoric rise from humble beginnings to become the PC industry leader in just over a decade. Along the way, Compaq helped change the face of computing while establishing the foundation for today's world of tablets and smart phones.

In a moment of self-absorption, Clara Purdy's life takes a sharp left turn when she crashes into a beat-up car carrying an itinerant family of six. The Gage family had been travelling to a new life in Fort McMurray, but bruises on the mother, Lorraine, prove to be late-stage cancer rather than remnants of the accident. Recognizing their need as her responsibility, Clara tries to do the right thing and moves the children, husband, and horrible grandmother into her own house--then has to cope with the consequences of practical goodness. What, exactly, does it mean to be good? When is sacrifice merely selfishness? What do we owe in this life and what do we deserve? Marina Endicott looks at life and death through the compassionate lens of a born novelist: being good, being at fault, and finding some balance on the precipice.

Charleston psychic Melanie Middleton discovers the past isn't finished revealing unsettling secrets in the third novel in the New York Times bestselling Tradd Street series. With her relationship with writer Jack Treholm as shaky as the foundation of her family home, Melanie's juggling a number of problems. Like restoring her Tradd Street house...and resisting her mother's pressure to 'go public' with her talent—a sixth sense that unites them to the lost souls of the dead. But Melanie never anticipated her new problem. Her name is Nola, Jack's estranged young daughter who appears on their doorstep, damaged, lonely and defiantly immune to her father's attempts to reconnect. Melanie understands the emotional chasm all too well. As a special, bonding gift Jack's mother buys Nola an antique dollhouse—a precious tableaux of a perfect Victorian family. Melanie hopes the gift will help thaw Nola's reserve and draw her into the family she's never known. At first, Nola is charmed, and Melanie is delighted—until night falls, and the most unnerving shadows are cast within its miniature rooms. By the time Melanie senses a malevolent presence she fears it may already be too late. A new family has accepted her unwitting invitation to move in—with their own secrets, their own personal demons, and a past that's drawing Nola into their own inescapable darkness...

This volume contains the proceedings of UIC 2009, the 6th International C- ference on Ubiquitous Intelligence and Computing: Building Smart Worlds in Real and Cyber Spaces. The UIC 2009 conference was technically co-sponsored by the IEEE and the IEEE Computer Society

Technical Committee on Scalable Computing. The conference was also sponsored by the Australian Centre of - cellence in Information and Communication Technologies (NICTA). UIC 2009 was accompanied by six workshops on a variety of research challenges within the area of ubiquitous intelligence and computing. The conference was held in Brisbane, Australia, July 7–9, 2009. The event was the sixth meeting of this conference series. USW 2005 (First International Workshop on Ubiquitous Smart World), held in March 2005 in Taiwan, was the ?rst event in the series. This event was followed by UISW 2005 (Second International Symposium on Ubiquitous Intelligence and Smart Worlds) held in December 2005 in Japan. Since 2006, the conference has been held annually under the name UIC (International Conference on Ubiquitous Intelligence and Computing). UIC 2006 was held in September 2006 in Wuhan andThreeGorges,China,followedbyUIC2007heldinJuly2007inHongKong, and UIC 2008 held in June 2008 in Oslo, Norway. Ubiquitous sensors,computers, networksand informationare paving the way towardasmartworldinwhichcomputationalintelligenceisdistributedthrou- out the physical environment to provide reliable and relevant services to people.

The papers in this volume were presented at TMRA 2007, the International Conference on Topic Maps Research and Applications, held October 11–12, 2007, in Leipzig, Germany. TMRA 2007 was the third conference in an annual series of international conferences dedicated to Topic Maps in science and industry. The motto of TMRA 2007 was ‖Scaling Topic Maps.‖ Taken literally the motto implies developing Topic Maps approaches that scale to large data and user volumes. This is a very real and useful research problem which is addressed by many of the contributions to the conference. But there is an even broader interpretation of the motto: wide adoption of Topic Maps in academia and industry. This is an equally important problem, and one that the TMRA conference series exists to help solve. And there is a more fanciful view on the motto. To ‖scale‖ can also mean to climb, so for the attendees the conference provided a way to ‖scale the mountain of Topic Maps.‖ In all these ways TMRA 2007 helped to scale Topic Maps.

‖A transition will be one of the greatest tests of your leadership, but it will also serve as one of the greatest rewards and testimonies of your legacy.‖ ‖Tom Mullins Successfully handing off the leadership baton to the next leader is essential to give our organization the best opportunity to thrive after our time of service. A smooth handoff requires meticulous planning and forethought. Yet most leaders put off even thinking about leadership transition until they are faced with a situation where they have no choice but to make a change. The results of not planning ahead can be devastating for both you and your beloved organization. Passing the Leadership Baton will help you manage the emotional transition yourself while fully supporting the next leader. Creating a seamless succession can be a challenge, but done successfully, it may very well be one of the greatest rewards you‖ll experience as a leader.
