The ICD codes are listed under "diagnosis" or "Dx," while other codes are typically CPT codes for services rendered. When you receive an explanation of benefits (EOB) from your insurance company, Medicare, or another payer, it also contains ICD codes. If a claim is not being paid, it may be because the ICD code does not align with the CPT code.

How to Look Up an ICD Code for Your Diagnosis
Medicare will deny coverage for ICD-10 code M85.80, "other specified disorders of bone density and structure, unspecified site", but will approve reimbursement for M85.81x-M85.89x, codes that specify the location (ankle, foot, forearm, hand, lower leg, shoulder, thigh, upper arm, or multiple sites) and laterality (left or right) of the bone disorder, i.e., M85.822, "other specified disorders of bone density and structure, left upper arm."

You Pay When Your Doctor Picks the Wrong Diagnosis Code

Medical codes are used to describe diagnoses and treatments, determine costs, and reimbursements, and relate one disease or drug to another. Patients can use medical codes to learn more about their diagnosis, the services their practitioner has provided, figure out how much their providers were paid, or even to double-check their billing from either their providers or their insurance or p

New CPT Code 99072 COVID PPE: Get Paid for Prep, Temp Checks

Used when billing PMIs, the private sector's diagnosis code system is based on WHO's earlier ICD-9 classification which was superseded in 1994 (when ICD-10 came into use by WHO member states). However the codes are not clinically maintained and the level of detail available is vastly inferior to that provided by ICD-10 (see 'Character analysis: NHS and private sector diagnosis codes compared').
