A New History of Documentary Film, Second Edition offers a much-needed resource, considering the very rapid changes taking place within documentary media. Building upon the best-selling 2005 edition, Betsy McLane keeps the same chronological examination, factual reliability, ease of use and accessible prose style as before, while also weaving three new threads - Experimental Documentary, Visual Anthropology and Environmental/Nature Films - into the discussion. She provides emphasis on archival and preservation history, present practices, and future needs for documentaries. Along with preservation information, specific problems of copyright and fair use, as they relate to documentary, are considered. Finally, A History of Documentary Film retains and updates the recommended readings and important films and the end of each chapter from the first edition, including the bibliography and appendices. Impossible to talk learnedly about documentary film without an audio-visual component, a companion website will increase its depth of information and overall usefulness to students, teachers and film

Through engaging storytelling and powerful photographs, *Courting Equality* takes readers through the volatile public debate following the legalization of same-sex marriage in Massachusetts—from the court cases to the protests and, finally, the weddings!

With this fourth volume, a history documenting the evolution of political processes in the United States is complete. The four volumes in *The Documentary History of the First Federal Elections* record the process by which the Confederation Congress and the thirteen original states implemented the electoral provisions of the federal Constitution of 1787. Contemporaries understood that the first federal Congress would "flesh out" the Constitution, and that the first federal elections were therefore an important step in the continuing struggle to shape, influence, and control the central government. The Constitution and the Confederation Congress allowed the states wide latitude in choosing Senators and in framing their laws for the election of the first presidential Electors and Representatives. This latitude encouraged experimentation and a lively public discussion about the entire electoral process. In all the volumes of *The Documentary History of the First Federal Elections*, the reader will find a wide range of sources from official proclamations to contemporary newspaper accounts, from biographical sketches of candidates to the election results. Maps showing electoral districts accompany the political developments in each state. Volume IV contains documents relating to elections in North Carolina and Rhode Island as well as to the election of the president and vice president.

First Peoples ' distinctive approach continues to make it the bestselling and most highly acclaimed text for the American Indian history survey. Respected scholar Colin G. Calloway provides a solid foundation grounded in timely scholarship and a narrative that brings a largely untold history to students. The signature " docutext " format of First Peoples strikes the ideal balance, combining in every chapter a compelling narrative and rich written and visual documents from Native and non-Native voices alike. An expansion by two full chapters presents a more diverse and nuanced picture of the history of Native peoples in America. Read the preface.

A history of the African Theatre, the first all-black theatre company in the United States. Founded in 1821 in New York by William Alexander Brown, the African Theatre was created in response to the social segregation of the day. Within its first year, however, the theatre had expanded its audience. No longer characterizing itself as a resort primarily for New York's African-American community, it began to address itself to New Yorkers in general. The author has researched and documented all available facts about the company: its members; productions; playhouses; length of operation; types of audiences; and the reasons for its demise.

Volumes 12 and 13 of this highly acclaimed documentary edition cover the first Congress's second

session, from January to August 1790. Among other important issues in this critical period, Congress debated Hamilton's report on the public credit, federal assumption of state Revolutionary War debts, and antislavery petitions from Pennsylvania Quakers. The editors once more have assembled the most complete and reliable text of the debates by examining a variety of sources: stenographer Thomas Lloyd's shorthand notes, his Congressional Register, and contemporary newspaper accounts.

This is the first volume of an ambitious project which, when completed, will offer to the historian of early America the first readily accessible account of the nation's first elections. Volume I documents the first federal elections in South Carolina, Pennsylvania, Massachusetts, and New Hampshire. This book also covers the Constitution, the Confederation Congress, and federal elections, as well as the Confederation Congress and the First Federal Election Ordinance of September 13th, 1788. Included in the three-volume set are hundreds of documents which together illuminate the critical political events of the time and the men who forged them. The documents are both official ones--legislative journals, debates, and laws relating to the elections--and unofficial ones, including material from letters, diaries, newspapers, broadsides, and other sources. The subjects treated include the providing for the elections by the Confederation Congress; public and private commentary prior to the elections; and summaries of official and unofficial actions for each of the thirteen original states. The editors have provided biographical sketches of the candidates for election and sketches of the political events of the time in introductions, headnotes, and editorial notes, in order to place the documents in their historical context. These documents, most of which have been available to scholars only under the most difficult of circumstances, provided the basis for a more complete understanding of the fundamental political acts required to implement the Constitution after its ratification: the election of Representatives, Senators, Electors, and

a President--the men who would give shape and meaning to the government created by the Constitution. Scholars and students of early American history, politics, and law will refer to these volumes frequently, in order to gain a fuller comprehension of the men, the events, and the temper of the times that led to the establishment of our early federal government.
