It examines the implications for cities and the designers of cities now we are required to again address their metabolic as well as social and formal dimensions, and it explores the extent to which environmental engineering and natural systems design can and should become drivers for the remaking of cities in the 21st century. Above all, it argues that sooner rather than later, urbanism needs to become environmentally literate, and environmental design needs to become culturally literate.

Ecological Urbanism The Nature Of The City

Ecological urbanism draws from ecology to inspire an urbanism that is more socially inclusive and sensitive to the environment. It is less ideologically driven, than green urbanism or sustainable urbanism. In many ways, ecological urbanism is an evolution of, and a critique of, Landscape Urbanism arguing for a more holistic approach to the design and management of cities.
