In Energy and Empire, George A. Gonzalez presents a clear and concise argument demonstrating that economic elites tied their advocacy of the nuclear energy option to post-1945 American foreign policy goals. At the same time, these elites opposed government support for other forms of energy, such as solar, that cannot be dominated by one nation.

Energy and Empire - SUNY Press

It analyzes the political factors that have compelled the US to strategically choose one source of energy over another, and underscores the significance of wealthy elites and their pursuit of hegemonic leadership. The argument, with several nuances and twists, is as follows: the role that energy plays in managing the US economy is not “ normal. ”
