Infrastructure is the very bedrock of our global society and environment, enabling the sustainable functionality of households and firms. From the roads which enable people to travel and commute, to water and energy systems that support quality of life and public health, infrastructure plays a crucial role in peoples' lives.

Infrastructure - Wikipedia

A well-identified Grand Challenge in Civil/Structural Engineering is to enhance the resiliency of contemporary engineering structures and infrastructure networks exposed to natural and man-made hazards and to improve sustainability in construction, operation, and decommissioning of structured facilities.
