Helen McKenna sits down with Marvin Rees, the Mayor of Bristol, to explore his approach to place-based leadership, the NHS 's role as a 'place-shaper' and the city 's experience of Covid-19. The second wave of Covid-19 offers new as well as ongoing challenges for the health and care system ...

Clear, engaging writing sparks an interest in nursing research and evidence-based nursing. Foundations of Nursing Research illuminates all steps of the nursing research process, helping readers understand the importance of research to evidence-based nursing practice, evaluate and critique research, and determine whether study findings are ready to apply in practice. Its conversational tone explains research simply and clearly. To illustrate specific aspects of the research process, extensive research study excerpts are interspersed throughout the book, including research performed outside the U.S. User-friendly learning features include chapter objectives, key terms, summaries, review questions, research links, and self-tests.

'The 4th edition of this extensive text is an outstanding resource prepared by nurses (and a librarian) for nurses. In a structured and helpful style it presents thousands of items from the literature - published papers, reports, books and electronic resources - as a clear, accessible, and most of all useful collection. The efforts to signpost and lead the reader to the sought-for information are effective and well-conceived, and the "How to use this book" section is remarkably simple...the book should be found in every nursing and health library, every research institute and centre, and close to many career researchers' desks' - RCN Research This latest edition of Resources for Nursing Research provides a comprehensive bibliography of sources on nursing research, and includes references for books, journal papers and Internet resources. Designed to act as a 'signpost' to available literature in the area, this Fourth Edition covers the disciplines of nursing, health care and the social sciences. Entries are concise, informative and accessible, and are arranged under three main sections: - 'Sources of Literature' covers the process of literature searching, including using libraries and other tools for accessing literature - 'Methods of Inquiry' includes an introduction to research, how to conceptualize and design nursing and health research, measurement and data collection, and the interpretation and presentation of data - 'The Background to Research in Nursing' encompasses the development of nursing research; the profession's responsibilities; the role of government; funding; research roles and careers; and education for research. Fully revised and updated, the Fourth Edition includes just under 3000 entries, of which 90% are new. It has extensive coverage of US, UK literature and other international resources. This new edition will be an essential guide for all those with an interest in nursing research, including students, teachers, librarians, practitioners and researchers.

The Fourth Edition of Introduction to Nursing Research is a distinct integration of evidence-based practice and research for the baccalaureate student and practicing registered nurses. It focuses on how students can incorporate research into their daily practice while considering all the newest trends and issues. This is not a typical introduction to nursing research book; it is an evidence-based practice text that uses research. The Fourth Edition focus on the meaning of evidence, the use of quality improvement, and the practical application of these aspects for the practicing health care provider.

Nutrition Psychology: Improving Dietary Adherence presents prominent psychological theories that are known to drive human eating behavior, and reveal how these models can be transformed into proactive strategies for adhering to healthy dietary regimens.

Evidence-Based Nursing is a resource designed to teach nursing students how to engage in evidence-based practice (EBP). This text helps students acquire a basic knowledge of research methodology and it teaches them to critically appraise published research.

This leading textbook of nursing research, written by two of the most renowned experts in the field, is now published in full-colour, and this, the 4th edition has now been updated throughout to reflect today's evidence-based practice.

With concise, focused coverage of community health nursing, Foundations of Nursing in the Community: Community-Oriented Practice, 4th Edition provides essential information for community practice - from nursing roles and care settings to vulnerable population groups. The book uses a practical, community-oriented approach and places an emphasis on health promotion and disease prevention. Practical application of concepts is highlighted throughout the text in case studies, critical thinking activities, QSEN competencies, and Healthy People 2020 objectives. Evidence-Based Practice boxes highlight current research findings, their application to practice, and how community/public health nurses can apply the study results. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels, to reinforce the concept of prevention as it pertains to community and public health care. Focus on health promotion throughout the text emphasizes initiatives, strategies, and interventions that promote the health of the community. Clinical Application scenarios offer realistic situations with questions and answers to help you apply chapter concepts to practice in the community. Case Studies provide client scenarios within the community/public health setting to help you develop assessment and critical thinking skills. What Would You Do? boxes present problem-solving challenges that encourage both independent and collaborative thinking required in community settings. How To boxes offer specific instructions on nursing interventions. NEW! QSEN boxes illustrate how quality and safety goals, competencies, objectives, knowledge, skills, and attitudes can be applied in nursing practice in the community. NEW! Feature box on Linking Content to Practice highlights how chapter content is applied in the role of public/community health nursing. NEW! Healthy People 2020 objectives in every chapter address the health priorities and emerging health issues expected in the next decade.

Based on: Public health nursing: population-centered health care in the community / [edited by] Marcia Stanhope, Jeanette Lancaster. 8th ed. c2012.

For undergraduate Nursing Research courses (BSN, RN-to-BSN). This best-selling, user-friendly undergraduate text follows the steps of the research process diligently: from problem identification and literature review, to development of hypotheses, design formulation, samples and data collection and data analysis.
