Freshwater Crayfish Aquaculture in North America, Europe ...
Virtually all crayfish culture also relies on natural reproduction rather than stocking hatchery-reared juveniles. The predominant cultured species in North America, the red swamp (Procambarus clarkii) and white river crawfish (P. zonangulus), are classified as "temperate" species; that is, they will tolerate cold winter conditions. Both species, however, possess a number of traits that are usually associated with animals that live in warm waters.

The red claw crayfish (Cherax quadricarinatus), referred to throughout the rest of this fact sheet simply by its Australian synonym 'redclaw', is a tropical species native to the rivers of north-west Queensland and the Northern Territory in Australia. Although well known to the local inhabitants of this isolated region, it remained effectively unknown to the rest of the world until the late 1980s, when it was trialled for aquaculture.
