Successful natural resource management is much more than good science; it requires working with landowners, meeting deadlines, securing funding, supervising staff, and cooperating with politicians. The ability to work effectively with people is as important for the conservation professional as it is for the police officer, the school teacher, or the lawyer. Yet skills for managing human interactions are rarely taught in academic science programs, leaving many conservation professionals woefully unprepared for the daily realities of their jobs. Written in an entertaining, easy-to-read style, The Conservation Professional 's Guide to Working with People fills a gap in conservation education by offering a practical, how-to guide for working effectively with colleagues, funders, supervisors, and the public. The book explores how natural resource professionals can develop skills and increase their effectiveness using strategies and techniques grounded in social psychology, negotiation, influence, conflict resolution, time management, and a wide range of other fields. Examples from history and current events, as well as real-life scenarios that resource professionals are likely to face, provide context and demonstrate how to apply the skills described. The Conservation Professional 's Guide to Working with People should be on the bookshelf of any environmental professional who wants to be more effective while at the same time reducing job-related stress and improving overall quality of life. Those who are already good at working with people will learn new tips, while those who are petrified by the thought of conducting public meetings, requesting funding, or working with constituents will find helpful, commonsense advice about how to get started and gain confidence.

Complete with handy checklists, procedural tips, and anecdotal evidence of previous sightings at each location, the guide is an inquisitive and informative supplement to—or replacement for—traditional tourist guidebooks of the Bay Area. Whether readers visit familiar haunts such as Alcatraz, Angel Island, Fisherman 's Wharf, or lesser-known locations such as the USS Hornet, the Old Bodega Schoolhouse, or the First and Last Chance Saloon, all are sure to encounter places and consider possibilities unexplored by the average visitor. With advice on what to do with a ghost, what to do after the ghost hunt, and other telekinetic tidbits, this guide encourages travelers to be attentive and imaginative, willing to take that extra spirit-sighting step. For the curious armchair traveler, it is lively twist on Bay Area history and landmarks. “ While sometimes scary, [the ghost stories] more often serve as reminders of the sometimes quirky, and oftentimes tragically haunting, history of the people of California. ” —The Reporter (Vacaville, CA) “ I thought I knew everything about the wine country, but I apparently overlooked the protoplasmic ‘ walk by night ’ world. ” —Mick Winter, author of The Napa Valley Book
