The great power ranking is based on the total development of a country + half of its non-tributary subjects' total development, divided by the current institution penalty (If no penalty, the value is 1). Note that this development count is not affected by autonomy, or status of the province (colonies contribute just as much as territories or states).

Great Power How To Super Charge Yourself To Success [EBOOK]

The possession of highly superior military capabilities is generally considered to be the most important element in distinguishing a superpower such as the United States from a major power such as France or the United Kingdom. A robust nuclear deterrence and the capacity to project military power anywhere in the world are key components of this. A superpower also draws its power from a superior economy, as well as the capacity to influence other states and international institutions (soft ...
