What are the benefits of using cell saver?**How to Build a Cell Saver** Haemonetics Cell Saver 5 Service
Our Cell Saver ® 5+ autologous blood recovery system is designed for use in procedures where medium- to high-volume blood loss occurs, such as trauma cases. With the ability to deliver moderate hematocrit and to help remove traces of undesirable components such as free hemoglobin, the system is the standard of care for participating hospitals and is a critical tool to help avoid unnecessary allogeneic transfusions.

Cell Saver® 5+ Autologous Blood Recovery System - Haemonetics®
Haemonetics pioneered intraoperative cell salvage. Since its introduction in 1972 our Cell Saver® technology led the industry to become the standard of care. The Cell Saver®5+ Autologous Blood Recovery System is designed for surgeries like CABG, valve replacement, trauma, orthopaedic, transplant, and other procedures where medium- to high-volume

Tuition includes necessary ...

Haemonetics® Learning Center - Product Training
Haemonetics Cell Saver 5 Features. The Haemonetics Cell Saver 5 is an Autologous Autotransfusion System. This autotransfusion system separates, washes, and packs red blood cells to be later infused into the patient. Unlike allogeneic transfusion where the blood donor and the patient are different people, the process that the CS5 uses is, autologous transfusion, where the blood donor and the patient are the same.
