There are exceptions as well such as, a second child is allowed if the first child is a girl or disabled and ethnic minorities (Wikipedia, 2014). Another exception is if either parent doesn't have any siblings. The policy has relaxed since 2013. There are arguments against and in favor of the one-child policy.

Morton 2005-04-15 This book is a critical biography of Grant Allen, (1848-1899), the first for a century, based on all the surviving primary sources. Born in Kingston, Ontario, into a cultured and affluent

This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's Communist revolution in 1949 set the stage, Chen says. The Korean War, the Taiwan Strait crises, and the Vietnam War--all of which involved China as a central actor--represented the only major "hot" conflicts during the Cold War period, making East Asia the main battlefield of the Cold War, while creating conditions to prevent the two superpowers from engaging in a direct military showdown. Beijing's split with Moscow and rapprochement with Washington fundamentally transformed the international balance of power, argues Chen, eventually leading to the end of the Cold War with the collapse of the Soviet Empire and the decline of international communism. Based on sources that include recently declassified Chinese documents, the book offers pathbreaking insights

into the course and outcome of the Cold War.

Autonomous. Independent. Dangerous. They tried to control her. Now she'll destroy them. Things have changed behind the walls of the Coventry, and new threats lurk in its twisted corridors. When Adeline returns to Arras, she quickly learns that something rotten has taken hold of the world, and now Cormac Patton needs her to help him reestablish order. However, peace comes at a terrible price. As the Guild manipulates the citizens of Arras, Adeline discovers that she's not alone, and she must let go of her past to fight for mankind's future. She will have to choose between an unimaginable alliance and a deadly war that could destroy everyone she loves.

This monograph presents an analysis of construction safety problems and on-site safety measures from an economist's point of view. The book includes examples from both emerging countries, e.g. China and India, and developed countries, e.g. Australia and Hong Kong. Moreover, the author covers an analysis on construction safety knowledge sharing by means of updatable mobile technology such as apps in Androids and iOS platform mobile devices. The target audience comprises primarily researchers and experts in the field but the book may also be beneficial for graduate students.

"A dark, suburban fantasy . . . richly funny, even whimsical, and bizarrely familiar." —The New Yorker In the seaside community of Donald Antrim's *Elect Mr. Robinson for a Better World*, the citizens are restless. The mayor has fired stinger missiles into the Botanical Garden reflecting pool, and his public execution was a messy affair. As these hawkish suburbanites fortify their houses with deadly moats and land mines, a former third-grade teacher named Pete Robinson steps forward with a tenuous bid to replace the mayor. But can anyone satisfy the terrible will of the people? By turns funny and phantasmagorical, fiercely intelligent and imaginative, Donald Antrim's story of suburban civics turned macabre is a new American classic.

Since the first implementation by Electricité de France on the Goulours dam (France) in 2006, the Piano Key Weir has become a more and more applied solution to increase the discharge capacity of existing spillways. In parallel, several new large dam projects have been built with such a flood control structure, usually in combination with gates. Today, more than 25 Piano Key Weirs are in operation or under construction all over the world. More than 15 years of research and development have enabled detailed investigations of the hydraulic and structural behaviour of the Piano Key Weir complex structure and have provided more and more accurate design equations. Following the proceedings of the first two workshops held in Liege (Belgium – 2011) and Paris (France – 2013), *Labyrinth and Piano Key Weirs III* collects the contributions presented by people with varied background, from researchers to practitioners, at the 3rd International Workshop on Labyrinth and Piano Key Weirs - PKW 2017 (22-24 February 2017, Qui Nhon, Vietnam). The papers, reviewed and accepted by an International Scientific Committee, summarize the current state-of-the-art on Piano Key Weirs from a theoretical to a practical point of view, and present most of the main projects in operation or under construction. *Labyrinth and Piano Key Weirs III* is thus a reference for students, practitioners and researchers interested in Dams Engineering.

Geologists, physicists and ecologists currently promote the idea of a post-Holocene epoch – the Anthropocene. As a result of constant innovation and modernisation in the fields of engineering, natural science, management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment. Humankind has become part of the environmental dynamics, to the extent that they are literally able to change ecosystems. Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere – from the smallest pool of water to the earth's atmosphere. Comprehensive infrastructure development in water and sanitation, the growing trend to seek additional resources in the form of groundwater, desalinated seawater, and recycled wastewater, as well as special attention being given to capturing and preserving rainwater, bear evidence of a timely response to climate change, population growth and rapid development in many water-stressed regions of the world. The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a time when the Union of South Africa was formed, in 1910, up to 2008, a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa, notable for increasing levels of aridity and more erratic rainfall patterns. This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation. The focus is on the Water–Energy–Food nexus, a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water, energy and food as resources.
