<p>At long last, Sarah Britton, called the “queen bee of the health blogs” by Bon Appétit, reveals 100 gorgeous, all-new plant-based recipes in her debut cookbook, inspired by her wildly popular blog. Every month, half a million readers—vegetarians, vegans, paleo followers, and gluten-free gourmets alike—flock to Sarah’s adaptable and accessible recipes that make powerfully healthy ingredients simply irresistible. My New Roots is the ultimate guide to revitalizing one’s health and palate, one delicious recipe at a time: no fad diets or gimmicks here. Whether readers are newcomers to natural foods or are already devotees, they will discover how easy it is to eat healthfully and happily when whole foods and plants are at the center of every plate.</p>

A novelty coffee-table book, celebrating the grandeur of mega-icon Kanye West. This is the Bible for the New Age.

The story of an awkward and scrawny mountain sheep with oversized horns who escapes the hunters to become the sensation of a ski resort.

<p>Where the hit Netflix series began! Journey into The Deep with the daring aquanaut family, The Nektons, aboard their state-of-the-art (and oh, so shiny) submarine, The Aronnax. When an earthquake off the coast of Greenland leads to strange reports of monster sightings, William and Kaiko Nekton, along with their kids, Fontaine and Ant (and of course, Ant's pet fish, Jeffrey), dive into the mystery! Will they find what they're looking for? Will they teach a fish to fetch? Will they be accidentally eaten? Find out in the all-ages adventure from #1 New York Times bestselling author, Tom Taylor (Injustice: Gods Among Us, All-New Wolverine, Star Wars: Adventures) and James Brouwer (Justice League Beyond).</p>

<p>Provides Step-by-Step Instruction Structural Analysis: Principles, Methods and Modelling outlines the fundamentals involved in analyzing engineering structures, and effectively presents the derivations used for analytical and numerical formulations. This text explains practical and relevant concepts, and lays down the foundation for a solid mathematical background that incorporates MATLAB® (no prior knowledge of MATLAB is necessary), and includes numerous worked examples. Effectively Analyze Engineering Structures Divided into four parts, the text focuses on the analysis of statically determinate structures. It evaluates basic concepts and procedures, examines the classical methods for the analysis of statically indeterminate structures, and explores the stiffness method of analysis that reinforces most computer applications and commercially available structural analysis software. In addition, it covers advanced topics that include the finite element method, structural stability, and problems involving material nonlinearity. MATLAB® files for selected worked examples are available from the book’s website. Resources available from CRC Press for lecturers adopting the book include: A solutions manual for all the problems posed in the book Nearly 2000 PowerPoint presentations suitable for use in lectures for each chapter in the book Revision videos of selected lectures with added narration Figure slides Structural Analysis: Principles, Methods and Modelling exposes civil and structural engineering undergraduates to the essentials of structural analysis, and serves as a resource for students and practicing professionals in solving a range of engineering problems.</p>

Automobiles haven't been around that long, but in their short history several types of cars stand out to the masses. Many people in the United States didn't own a car until Henry Ford produced the Model T for the purpose of being a car the average American could afford. This set follows the history of some of the most iconic automobile makes and models, including Alfa Romeos and Mustangs. It encourages readers to think critically about how cars, an integral piece of everyday life, have come to shape the world. Features include: Fact boxes and sidebars provide readers with additional information about these cars' history that some people may not know. Timelines show the development of these cars throughout history. Follows the C3 Framework for Social Studies State Standards of the National Council for the Social Studies.

<p>Two-time Peabody Award-winning writer and producer Ira Rosen reveals the intimate, untold stories of his decades at America’s most iconic news show. It’s a 60 Minutes story on 60 Minutes itself. When producer Ira Rosen walked into the 60 Minutes offices in June 1980, he knew he was about to enter television history. His career catapulted him to the heights of TV journalism, breaking some of the most important stories in TV news. But behind the scenes was a war room of clashing producers, anchors, and the most formidable 60 Minutes figure: legendary correspondent Mike Wallace. Based on decades of access and experience, Ira Rosen takes readers behind closed doors to offer an incisive look at the show that invented TV investigative</p>

journalism. With surprising humor, charm, and an eye for colorful detail, Rosen delivers an authoritative account of the unforgettable personalities that battled for prestige, credit, and the desire to scoop everyone else in the game. As Mike Wallace's top producer, Rosen reveals the interview secrets that made Wallace's work legendary, and the flaring temper that made him infamous. Later, as senior producer of ABC News Primetime Live and 20/20, Rosen exposes the competitive environment among famous colleagues like Diane Sawyer and Barbara Walters, and the power plays between correspondents Chris Wallace, Anderson Cooper, and Chris Cuomo. A master class in how TV news is made, Rosen shows readers how 60 Minutes puts together a story when sources are explosive, unreliable, and even dangerous. From unearthing shocking revelations from inside the Trump White House, to an outrageous proposition from Ghislaine Maxwell, to interviewing gangsters Joe Bonanno and John Gotti Jr., Ira Rosen was behind the scenes of 60 Minutes' most sensational stories. Highly entertaining, dishy, and unforgettable, Ticking Clock is a never-before-told account of the most successful news show in American history.

Marbletown, one of the many wonders of the Hudson Valley, is located in the rich historical area of the Catskills. Just six miles south of Kingston on the Old Mine Road, Marbletown once served as the capital of New York State, when Kingston was burned by the British in 1777. The township is made up of the individual hamlets of Cottekill, High Falls, Kripplebush, Lomontville, Stone Ridge, Marbletown, and Vly Atwood. Through vintage photographs, Marbletown provides a glimpse of how early residents lived, capturing the distinct personalities that have shaped the township's history and drawn generations eager to experience the beauty of Marbletown and the charm of its people.
