In *Grow Your Own Spices*, author and spice-growing gardener Tasha Greer hands you everything you need to know to grow a thriving spice garden, with practical tips and in-depth advice on cultivating over 30 different spices. Unlike herbs, which consist of the green leaves of certain plants, spices come from the seeds, roots, bark, or berries of plants, which means growing, harvesting, and preparing spices is a lot more nuanced than growing leafy herbs. Start with easy-to-grow seed spices first, such as sesame seeds, fennel, and cumin, then graduate to more challenging spice varieties, such as star anise, cinnamon, and nutmeg. Spices not only offer culinary flare, there's also increasing evidence of their ability to fight inflammation and reduce various health risks. Medical usage tips from expert herbalist Lindsey Feldpausch are found throughout the book and offer well-researched advice on how to use homegrown spices to improve your well-being. Regardless of whether you're using spices as a health-boosting supplement or simply to power-up the flavor of your meals, purchasing spices is an expensive proposition.
