Grab your magical sword and take the place of your favorite fantasy character with this fun and historically accurate how-to guide to solving epic quests. What should you ask a magic mirror? How do you outwit a genie? Where should you dig for buried treasure? Fantasy media ' s favorite clichés get new life from How to Slay a Dragon: A Fantasy Hero ' s Guide to the Real Middle Ages, a historically accurate romp through the medieval world. Each entry presents a trope from video games, books, movies, or TV—such as saving the princess or training a wizard—as a problem for you to solve, as if you were the hero of your own fantasy quest. Through facts sourced from a rich foundation of medieval sources, you will learn how your magical problems were solved by people in the actual Middle Ages. Divided into thematic subsections based on typical stages in a fantastical epic, and inclusive of race, gender, and continent, How to Slay a Dragon is perfect if you ' re curious to learn more about the time period that inspired some of your favorite magical worlds or longing to know what it would be like to be the hero of your own mythical adventure.

This publication reflects the changes in television, both domestically and internationally and is a useful guide to the legal, economic, and production aspects of the industry.

"The advent of the crossbow more than 2,500 years ago effected dramatic changes for hunters and warriors. For centuries, it was among the most powerful and widely used handheld weapons, and its popularity endures to this day. A Deadly Art presents a lively, accessible survey of the crossbow's "golden age," along with detailed descriptions of twenty-four remarkable examples. Beginning in the middle ages, the European aristocracy's enthusiasm for the crossbow heralded shooting competitions and pageants that featured elaborately decorated weapons bearing elegant embellishments of rare materials and prized artistry. In addition to being highly functional, these weapons were magnificent works of art. A Deadly Art includes fascinating descriptions of crossbows used by Margaret of Savoy and Holy Roman Emperors Maximilian I and Charles V, among others."--Publisher's description.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
