The First World War was a disaster whose repercussions are still felt. This book goes behind the battlefronts to focus on the politics of the war. David Stevenson explains why the governments of the day turned to violence in pursuit of their aims; why the resulting conflict expanded to global dimensions; why it could not be ended by compromise; the international significance of the Russian revolution and the entry into the war of the USA; and why the eventual peace settlement took the form it did. The First World War and International Politics sets the events of 1914-18 in the context of twentieth-century world history; it also illuminates the political background of wars in general, and illustrates Clausewitz's dictum that 'war...is a true political instrument, a continuation of political activity by other means.'

This book provides the first comprehensive picture of lifelong learning and the radical changes needed if it is to become the cultural norm. Clearly written and readily accessible, the book identifies the shifts in attitude and behaviour which are needed to establish a lifelong learning culture. Looking ahead over the next quarter of a century, Jim Smith and Andrea Spurling show how government and learning providers must fundamentally reassess their use of time, space and finance. But, more than that, they also offer a practical, comprehensive and robust strategy for lifelong learning. Through trenchant analysis based on research commissioned by The Lifelong Learning Foundation, this book shows ways of confronting difficult choices and realizing the aim of comprehensive lifelong learning.

More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

F Power Mode Fitness Systematic workout Program for no doubt gives you the best results to achieving a fit body but challenging yourself with new exercises and workouts is a different discussion. When your body gets used to a specific workout program, it loses its effectiveness. For example if you do sit-ups every day in a month and increase the number of reps as days pass, not only it doesn't help your body to burn fats and build muscles, but it makes this exercise easy for your body and it loses its effectiveness. If you always get your body in to new challenges and learn more exercises, for sure, your body is going to be fit. In this book we challenge you and your body to new workouts and exercises. All of the body parts, legs, abs, and upper body... have been categorized in their own section and each section consists of steps. Each step is different from each other and is a challenge for you. From step 1 as you go forward you face new exercises and different levels of reps for each exercise which has been divided to 3 Modes: Minimum, Middle, and Maximum. Each step is a prerequisite for the next one. If you find a step hard, don't rush ahead to the next step. Just practice this one in your workout till you get comfortable with it and then go for the next step. Choose your Specific Body Type workout program that suits your body. Follow along with our workout program and know that if you are serious to be fit, you are in the right way. Remember, always challenge yourself. Website: <http://fpowermode.com/>

Best Book of April! The city of Neo Songdo is a Russian doll of realities — augmented and virtual spaces anchored in the weight of the real. The smart city is designed to be read by machine vision while people see only the augmented facade of the corporate ideal. At night the stars are obscured by an intergalactic virtual war being waged by millions of players, while on the streets below people are forced to beg, steal, and hustle to survive. Enter Julius Dax, online repoman and real-life thief. He's been hired for a special job: stealing an unknown object from a reclusive tech billionaire. But when he finds out he's stolen the first sentient AI, his payday gets a lot more complicated.
