The updated Third Edition of ICU Recall facilitates rapid review and memorization with a concise question and answer format. Topics include ethics, pharmacology, radiology, and, especially, ICU-focused questions. You'll find complete coverage of multi-system pathologic processes such as malnutrition, immunosuppression, neoplasia, and manifestations of infection, as well as patient-specific issues such as trauma, burns, transplants, and pediatric problems. This edition includes new techniques for cardiac support, renal support, and immunosuppression and thoroughly updated information on pharmacology, radiology, and monitoring. The enclosed bookmark helps readers self-test by covering the answers.

"Health Psychology in Context encourages a full understanding of the evidence base underlying effective clinical practice. Topics include the impact of critical illness on well-being; implications of chronic illness for well-being; psychological aspects of pain; appearance-related concerns and their consequences for well-being; body image dissatisfaction, approaches for prevention and treatment of obesity in children and adults; mental health and well-being; the impact of childhood chronic illness and disability on family life; and challenges faced by health professionals in attempting to change health beliefs and health behaviour."--BOOK JACKET.

This title enables readers to understand how to undertake appropriate neurophysiological investigations in the critical care setting. The book addresses the scientific principles (biological and technological), recording techniques, the development of electrical potentials in normal subjects, and the ways these are disturbed by trauma, surgery and disease. The impact of digital technologies and the possibilities of quantification,

A revised new edition of this comprehensive critical care nursing text, developed with the Australian College of Critical Care Nurses (ACCCN). This second edition of ACCCN's Critical Care Nursing has been fully revised and updated for critical care nurses and students in Australia and New Zealand. As well as featuring the most recent critical care research data, current clinical practice, policies, procedures and guidelines specific to Australia and New Zealand, this new edition offers new and expanded chapters and case studies. The ultimate guide for critical care nurses and nursing students alike, ACCCN's Critical Care Nursing 2e has been developed in conjunction with the Australian College of Critical Care Nurses (ACCCN). As with the first edition, the text in ACCCN's Critical Care Nursing 2e reflects the expertise of ACCCN's highly-qualified team of local and international critical care nursing academics and clinicians. This authoritative nursing resource takes a patient-centred approach, encouraging practising critical care nurses and students to develop effective, high-quality critical care nursing practice. ACCCN's Critical Care Nursing 2e outlines the scope of critical care nursing, before detailing the core
