In Scotland, the term Community Learning and Development (CLD) is used to incorporate community-based adult learning, youth work, and community capacity building under a single professional rubric. Known as the empowering profession, CLD is an informal educational practice that seeks to serve people in communities.

~~MA Learning in Communities | The University of Edinburgh~~  
This paper seeks to examine the notion of schools as Learning Communities, and to reclaim the educational components of the debate as a basis for the continuing professional education of educators and the concomitant benefits for their students. In our view, professional development is learning. Professional development for the learning community is creating a learning community, and the process is one of learning.

~~Learning Communities in Education: Directions for ...~~  
A learning community is a group of people who share common academic goals and attitudes and meet semi-regularly to collaborate on classwork. Such communities have become the template for a cohort-based, interdisciplinary approach to higher education. This may be based on an advanced kind of educational or 'pedagogical' design. Community psychologists such as McMillan and Chavis state that there are four key factors that defined a sense of community: " membership, influence, fulfillment of indivi

Four categories of student learning communities are identified: curricular learning communities, classroom learning communities, residential learning communities, and student-type learning communities.

Like the first edition, the second edition of Learning by Doing: A Handbook for Professional Learning Communities at Work helps educators close the knowing-doing gap as they transform their schools into professional learning communities (PLCs).

Build a community in your school and improve learning outcomes with this one-stop sourcebook that features the latest educational issues, new research-based strategies and activities, and more!

This research-based sequel to *Leading Professional Learning Communities* focuses on the practical process of implementing, improving, and sustaining PLCs. Appropriate for groups at all stages of PLC development, this field book helps educators improve PLC operations by facilitating individual and group development and growth. The authors provide learning opportunities that generate conversations about adult learning and contribute to supportive conditions that strengthen teacher quality and raise student outcomes.

In classrooms that operate as learning communities, the social and learning purposes advance together through all participants being involved and engaged in building knowledge. This book demonstrates a new way of seeing and managing classrooms through: an integration of what's best in learning and what's best in the social life of classrooms a vision of the role of the teacher that is more creative and more related to the commitments of teachers a more connected view of schools in contrast to the mechanistic view that currently dominates an answer to the short-term performance pressures of politicians - better performance. The practice and vision of classrooms that operate as learning communities is presented clearly and encourages teachers to take steps towards building a more effective classroom with the aspects of learning communities they choose.

*Building Online Learning Communities* further explores the development of virtual classroom environments that foster a sense of community and empower students to take charge of their learning to successfully achieve learning outcomes. This is the second edition of the groundbreaking book by Rena Palloff and Keith Pratt and has been completely updated and expanded to include the most current information on effective online course development and delivery. A practical, hands-on guide, this resource is filled with illustrative case studies, vignettes, and examples from a wide variety of successful online courses. The authors offer proven strategies for handling challenges that include: Engaging students in the formation of an online learning community. Establishing a sense of presence online. Maximizing participation. Developing effective courses that include collaboration and reflection. Assessing student performance. Written for faculty in any distance learning environment, this revised edition is based on the authors many years of work in faculty development for online teaching as well as their extensive personal experience as faculty in online distance education. Rena M. Palloff and Keith Pratt share insights designed to guide readers through the steps of online course design and delivery.

Provides recommendations on ways to improve school performance.

Imagine all professionals in all schools engaged in continuous professional learning! Education experts Shirley M. Hord and William A. Sommers explore the school-based learning opportunities offered to school professionals and the principal's critical role in the creation, development, and support of an effective professional learning community (PLC). This book provides school leaders with readily accessible information to guide them in initiating and developing a PLC that supports teachers and students. Using field-tested examples, the text illustrates how this research-based school improvement model can help educators: Increase leadership capacity Embed professional development into daily work Create a positive school culture Develop accountability Boost student achievement

The purpose of this book is to clearly define an approach to school improvement that uses professional learning community (PLC) practices to achieve school improvement and success for every student. This book offers information, examples and case studies to clarify the concept of a PLC, to respond to critical issues in schools, and to support educational leaders in addressing the important mandates of accountability and school improvement. As school leaders proactively lead efforts to create learning communities, their schools, districts, and staff will incorporate knowledge, skills, and practices that focus on teaching and learning for all. The authors' findings will assist leaders, change agents, policy makers, and university faculty in guiding schools toward creating and maintaining PLCs as they sustain school improvement for student learning.

This book offers information, examples and case studies to clarify the concept of a professional learning community, to respond to critical issues in schools, and to support educational leaders in addressing the important mandates of accountability and school improvement.
