The revolution in typesetting - a revolution that over the past two decades has eliminated a five-hundred-year-old system of hot metal production and replaced it with one of photo-generated and computer-driven composition - shows no sign of winding down. This book, more than any other we know, traces the steps that went into that revolution and simultaneously makes the argument that the letter forms themselves are in process of evolution. Tracy argues that, whether they are of the sixteenth or the twentieth century, the forms that comprise our alphabet are subject to the same rules of good taste, proportion, and clarity that have always obtained. But what we face today is vastly different from fifty years ago. For the first time, new technology has made the proliferation (and, as some would maintain, debasement) of letter forms fast and easy (or quick and dirty.) With fifty years of professional experience on both sides of the Atlantic (including thirty years as head of type design for the British Linotype Company), Tracy is in a unique position to make this argument and arrive at his sad conclusion: the design of distinguished, contemporary typefaces is far outnumbered by the mediocre and downright bad. Part of the reason for this deplorable deterioration is a lack of critical analysis of the particular esthetics involved. This step-by-step examination of type-design esthetics is precisely what Tracy provides here, while avoiding both the promoter's hype and the manufacturer's claims. Here are the gut issues of what makes type good or bad, legible or unreadable. Extensively illustrated with both typefaces and line drawings, this book belongs on the shelf of anyone interested in the history of letters or in the artistry and peculiar problems that lie behind their production.

Sir Mungo Malagrowther is a fictional character in Walter Scott's 1822 *The Fortunes of Nigel*. He is a courtier soured by misfortune, and who would have everyone be as discontented as himself. In 1826 Scott wrote the *Letters of Malachi Malagrowther* to attack British government proposals to reform the issue of banknotes by private banks, adopting the transparent persona of a purported descendent of Sir Mungo. His campaign led to Scottish banks continuing to print their own banknotes.

"With an appendix containing a full analysis of the debts of the United States, the several states, municipalities etc. Also statements of street railway and traction companies, industrial corporations, etc." (statement omitted on later vols.)

In Letters from the Land of Cancer Ebook, award-winning writer Walter Wangerin Jr. offers his profound insights into the greatest challenge we face: confronting our own mortality. “ Shortly after the cancer had been diagnosed I began writing letters to the members of my immediate family, to relatives and to lifelong friends. The following book will consist mostly of those letters. They will invite you into my most intimate dancing with the cancer, even as that partner and I have over the last two years swung each other around the tiled floors of ballrooms and bathrooms. Dizzy still, and day by day, I sat and wrote: This is what I ’ m feeling right now. This is what I think.... ” From afternoon to afternoon of radiation, Wangerin wrote about confronting his mortality, about living with the messiness of undone tasks and bodily weakness. He wrote about the medical procedures he endured, the wild mood swings that unbalanced his days, and the fragilities and strengths of the relationships that surrounded him. Letters from the Land of Cancer Ebook is made up of these writings. Cadenced within the letters are Wangerin ’ s eloquent meditations derived from his pastoral experiences with the faithful passage of death to life. Seldom has the great adventure of life and death been as beautifully presented as it is in this testimony to faith, love, and the shocking reality of hope.
