As the first translator of Plato's complete works into Latin, the Florentine writer Marsilio Ficino (1433-99) and his blend of Neoplatonic and Hermetic philosophy were fundamental to the intellectual atmosphere of the Renaissance. In Spain, his works were regularly read, quoted, and referenced, at least until the nineteenth century, when literary critics and philosophers wrote him out of the history of early modern Spain. In Ficino in Spain, Susan Byrne uses textual and bibliographic evidence to show the pervasive impact of Ficino's writings and translations on the Spanish Renaissance. Cataloguing everything from specific mentions of his name in major texts to glossed volumes of his works in Spanish libraries, Byrne shows that Spanish writers such as Miguel de Cervantes, Lope de Vega, Bartolom de las Casas, and Garcilaso de la Vega all responded to Ficino and adapted his imagery for their own works. An important contribution to the study of Spanish literature and culture from the fifteenth to the seventeenth centuries, Ficino in Spain recovers the role that Hermetic and Neoplatonic thought played in the world of Spanish literature.

This collection of essays analyses the publication and reception history of sixteenth-century Iberian books of chivalry in English translation in early modern England. A comprehensive introduction explains the subject, its importance for the study of early modern fiction writing in general, and the state of Anglo-Spanish literary relations at the time. Various contributors consider the impact of the Iberian chivalric writing on other contemporary genres, such as native English romance, letter-writing, and chronicle, and explore the influence of translations in English prose fiction from the 1590s up to the mid-seventeenth century. The volume delves into Anthony Munday ' s role in the literary book market, approaching some of his most representative translations – Amadis, Palmendos, Primaleon of Greece, and Palmerin of England – and examining the contribution of these works to early modern cultural debates on sexuality, marriage, female individualism, colonialism, and religious controversy.

A study of classical influences on Cervantes, with particular attention to Raphael.

The story of the beliefs and practices called 'magic' starts in ancient Iran, Greece, and Rome, before entering its crucial Christian phase in the Middle Ages. Centering on the Renaissance and Marsilio Ficino - whose work on magic was the most influential account written in premodern times - this groundbreaking book treats magic as a classical tradition with foundations that were distinctly philosophical. Besides Ficino, the premodern story of magic also features Plotinus, Iamblichus, Proclus, Aquinas, Agrippa, Pomponazzi, Porta, Bruno, Campanella, Descartes, Boyle, Leibniz, and Newton, to name only a few of the prominent thinkers discussed in this book. Because pictures play a key role in the story of magic, this book is richly illustrated.

Why was the mission to the Moon named after the God of the Sun, and not after a Moon Goddess or God? In this unconventional work, Philippe Sibaud explores the symbolism behind the 1969 landing on the Moon. More than fifty years after this seminal event, and whilst the Moon is attracting renewed interest, the author offers a bold new interpretation of the iconic Apollo mission. Was the Apollo landing the ultimate triumph of solar consciousness over the ancient lunar ways, a concrete enactment of the god Apollo mythically slaying the mother dragon at Delphi, or can the whole venture be seen as the sacred union of Sun and Moon, birthing a new vision at a time of great need? By weaving his own personal story with a greater cultural and symbolic narrative, Philippe Sibaud invites us to reflect on the importance of myths and the power of the Imagination to unlock the deeper meaning of our individual and collective experiences. You will never look at the Moon with the same eyes again.
