The evidence informing Mental Health First Aid courses includes a series of Guidelines developed through the Delphi Consensus Method, a way of reaching consensus within and between expert groups. Experts included in these studies have included people with personal lived experience of mental health problems and caregivers, in addition to clinical and research experts from around the world.

**Mental Health First Aid International**

Mental Health First Aid (MHFA), www.mhfa.ca, is the help provided to a person developing a mental health problem or experiencing a mental health crisis. Just as physical first aid is administered to an injured person before medical treatment can be obtained, MHFA is given until appropriate treatment is found or until the crisis is resolved.

**Mental Health First Aid | Mental Health Commission of Canada**

Mental Health First Aid for Adults teaches people how to recognize signs of mental health or substance use challenges in adults ages 18 and older, how to offer and provide initial help, and how to guide a person toward appropriate care if necessary. Topics covered include anxiety, depression, psychosis, and addictions.

**Adults – Mental Health First Aid**

Mental health first aid is the help offered to a person who is developing a mental health problem or who is experiencing a mental health crisis, until appropriate professional treatment is received or until the crisis resolves. It follows the model that has been successful with conventional first aid.

**Mental Health First Aid Ireland – Mental Health First Aid ...**

Having a Mental Health First Aider on site will help you to spot the early signs of a mental health problem and encourage people to speak to the Mental Health First Aider and seek help. This will help reduce the effects on the individual, the people around them and encourage a speedier recovery in a supportive environment.

**Mental Health First Aid (Wales) | Ajuda**

Mental Health First Aid (MHFA) is a training course which teaches people how to identify, understand and help someone who may be experiencing a mental health issue. Furthermore, MHFA won't teach you to be a therapist, but it will teach you to listen, reassure and respond, even in a crisis and even potentially stop a crisis from happening.

This manual "has been written to accompany the 12-hour Mental Health First Aid course. The course is designed for members of the public to learn how to assist someone who is developing a mental illness or is in a mental health crisis." - page iii.

Participant manual for people who take the Youth Mental Health First Aid course

This Manual is for senior adolescents in years 10 - 12 to assist friends who have mental health problem.

Psychological first aid, or PFA, is designed to mitigate the effects of acute stress and trauma and assist those in crisis to cope effectively with adversity. PFA is designed to be applied in emergencies, including disasters and terrorist attacks. In this essential guide, George S. Everly, Jr., developer of the Johns Hopkins RAPID PFA method, and Jeffrey M. Lating, his collaborator in its implementation, describe the principles and practices underpinning this psychological model in an easy-to-follow, prescriptive, and practical manner. They explain the history of PFA and persuasively demonstrate its powerful versatility. Mental health practitioners can apply PFA in all settings. It can also be used as a public-health tool to address mental health needs following critical incidents and as a means for building community resilience. Aimed at mental health practitioners, all first responders, and global health disaster teams such as Médecins Sans Frontières and the World Health Organization, The Johns Hopkins Guide to Psychological First Aid is the first book to thoroughly explain RAPID PFA. RAPID, a unique theoretically grounded and evidence-based PFA method, follows a set of easily understood principles. In each chapter, Everly and Lating provide a step-by-step approach and include a key point summary to emphasize essential elements. A unifying case exemplifies each phase of the RAPID PFA model in an ongoing dialogue that presents ideal PFA responses, examples of common mistakes, and various outcomes. In addition to their counseling experience in Kuwait after the Gulf War and in New York City after the September 11 attacks, the authors have traveled nationally and internationally to teach the RAPID PFA method in numerous public health, fire, police, military, and faith-based settings. Beneficial to those with little or no previous mental health training, this book is an essential tool for people who want to learn, to practice, or to retain their ability to use psychological first aid effectively.

The 3rd edition Youth MHFA Manual (2013) was written to accompany the 14-hr Youth MHFA Course.

Originally published in 1980, First Aid in Mental Health offers a clear, helpful and sympathetic guide to the nature of mental illness and the kinds of help and treatment available at the time. Joy Melville looks in particular at: warning signs, medical help, schizophrenia, anxiety and stress, depression, post-natal depression, anorexia, elderly mentally infirm, patient's rights, treatment, and supplies not only a practical and sensible account of the nature and problems of mental illness, but also the reassurance that the sufferers and their families are not alone and help is available.
