the Miller 225NT for a back-up generator for my house. i looked at the specs, but i dont understand the curve listed 100%. i know that the Lincoln Ranger8 puts out 8000watts at 220, but only 4000 at 120v. looking at the Miller i believe it puts out 9000 at either 220 or 120. i hope this is the case.
