The First Space Race reveals the inside story of an epic adventure with world-altering stakes. From 1955 to 1958, American and Soviet engineers battled to capture the world's imagination by successfully launching the world's first satellite. The race to orbit featured two American teams led by rival services—the Army and the Navy—and a Soviet effort so secret that few even knew it existed. This race

ushered in the Space Age with a saga of science, politics, technology, engineering, and human dreams. Before 1955, the concept of an artificial satellite had been demonstrated only on paper. The first nation to transform theory into practice would gain advantages in science, the Cold War propaganda contest, and the military balance of power. Visionaries such as America's Wernher von Braun and Russia's Sergey Korolev knew these fields of endeavor would be affected by the launch of a satellite. Moved by patriotism, inquisitiveness, and pride, people on both sides of the Iron Curtain put forth heroic efforts to make that first satellite possible. Some aspects of this story, like the Navy's NOTSNIK satellite project, are almost unknown. Even some details of well-known programs, such as the

appearance of America's pioneering Explorer 1 satellite and the contributions made by its rival, Project Vanguard, are generally misremembered. In this book, authors Matt Bille and Erika Lishock tell the whole story of the first space race. They trace the tale from the origins of spaceflight theory and through the military and political events that engendered the all-out efforts needed to turn dreams into reality and thus shape the modern world.

Association, is a full and exciting account of all the many campaigns, operations and deployments conducted around the world from the Cold War and the Cod Wars to the Falklands War and the Gulf Wars. It has been written and compiled from privileged access to secret and confidential Admiralty Plans and Commanding Officers' reports and contains a wealth of previously unpublished material. The story of how the Royal Navy has adapted to meet the many new challenges of the modern world and how it has carried out its vital roles from manning the nation's strategic nuclear deterrent to guarding the vital offshore oil and gas facilities as well as protecting Britain's worldwide interests is a truly fascinating one, while the development of ships, submarines, aircraft,

**Weapons**, tactics and strategies as well as the changes in personnel and life at sea are brought to life by contributions from people who served over the period. Profusely illustrated throughout with many previously unpublished photographs and paintings, this beautifully-produced volume is a magnificent golden jubilee tribute to the Royal Navy.

This state-of-the-art book provides a comprehensive overview of the most common patellofemoral joint problems. Utilizing the latest evidence, it guides readers through prevention, diagnosis and treatment for both adult and paediatric patients. After discussing clinical examination and diagnosis, it explores topics such as acute and recurrent dislocation of the patella, cartilage defects of the joint,
