Featuring a zoom magnification of 7.5X and a long working distance of 115mm, Nikon SMZ745 microscopes are well suited for both industrial and biomedical applications. The adoption of a new total reflection prism produces brighter images with higher contrast, and the anti-mold design allows the microscope to be used in environments where the temperature and humidity are high.

Therefore, in an instruction of  
Nikon SMZ-10 one could find a  
process description. An  
instruction's purpose is to teach,  
to ease the start-up and an item's  
use or performance of certain  
activities. An instruction is a  
compilation of information about  
an item/a service, it is a clue.
