transporters expressed in the eye, with special emphasis on their role in drug delivery. The complex anatomy and the existence of multiple barriers in the eye pose a considerable challenge to successful drug delivery to the eye. Hence ocular transporters and receptors are important targets for drug delivery.

This chapter describes various techniques for the characterization of ocular transporters.

Transporters are membrane-bound proteins that can be broadly classified as efflux and influx transporters. They play a crucial role in determination of drug bioavailability.
