Stephen Hawking explains how such great men of science as Copernicus, Galileo, Kepler, Newton and Einstein built on the discoveries of those who came before them, and how these works changed the course of science, ushering astronomy and physics out of the Middle Ages and into the modern world.

The most recondite and obscure scholarly squabbles are transmuted into the material of comedy as the ostensible subject is shouldered to one side by yet another hobby horse from Merton's densely populated stable. Kareem Abdul-Jabbar was born in the midst of a cultural reawakening, carried on the shoulders of athletes trying to prove there was a lot more at stake than a ball game, men and women who made music that could break your heart, and writers and intellectuals who gave voice to not just the ideals of a movement but the raw emotions. Kareem tells what it took to get these revolutionaries to Harlem and how they changed the world. A world that is still riding on the shoulders of giants.
