The action intervention may be part of the research design. Participatory action research requires the people who are the subject of the study both to take part in making the analysis and then to...

'Participatory' action research - when is it, when is it not?

Participatory action research comprises a family of research methodologies which aim to pursue action and research outcomes at the same time (PAR, action learning, soft systems methodology, developmental evaluation, etc.). It therefore has some components which resemble consultancy or change agency, and some which resemble field research.

Participatory action research - Learning for Sustainability

relevant to a specific community (16). Participatory research typically involves selecting research issues related to dependence, oppression, and other inequities in need of evaluation (15). In contrast, action research uses findings to reveal strategies that can address community issues. Community needs are evaluated and action is taken with the purpose of social change through development of services and organizations (14,16).
