Why do we find ourselves living in an Information Society? How did the collection, processing, and communication of information come to play an increasingly important role in advanced industrial countries relative to the roles of matter and energy? And why is this change recent--or is it? James Beniger traces the origin of the Information Society to major economic and business crises of the past century. In the United States, applications of steam power in the early 1800s brought a dramatic rise in the speed, volume, and complexity of industrial processes, making them difficult to control. Scores of problems arose: fatal train wrecks, misplacement of freight cars for months at a time, loss of shipments, inability to maintain high rates of inventory turnover. Inevitably the Industrial Revolution, with its ballooning use of energy to drive material processes, required a corresponding growth in the exploitation of information: the Control Revolution. Between the 1840s and the 1920s came most of the important information-processing and communication technologies still in use today: telegraphy, modern bureaucracy, rotary power printing, the postage stamp, paper money, typewriter, telephone, punch-card processing, motion pictures, radio, and television. Beniger shows that more recent developments in microprocessors, computers, and telecommunications are only a smooth continuation of this Control Revolution. Along the way he touches on many fascinating topics: why breakfast was invented, how trademarks came to be worth more than the companies that own them, why some employees wear uniforms, and whether time zones will always be necessary. The book is impressive not only for the breadth of its scholarship but also for the subtlety and force of its argument. It will be welcomed by sociologists, economists, historians of science and technology, and all curious in general.

At the age of just 19, JW Murphey didn't have access to large amounts of private security industry experience, a bunch of cash, an eBook or the Internet to help him start his security guard company. But, he didn't want to spend years as another cog inside of a large security corporation. Instead of staying employed with a big corporation, he struck out on his own and started his own security agency. Now, in its 4th edition, published by The Security Officer Network, the popular How to Start a Security Guard Company book includes Murphey's creative strategies for building a private security agency with a minimal up-front investment. This isn't another generic "how to form a business" book. You will easily find a plethora of free resources on the Internet where you can learn business startup basics. This book won't waste your time repeating this information; instead, readers receive immediately actionable advice that's specifically tailored to the private security industry. Written by an author who actually started his own agency, the book details his innovative approaches and strategies; imparts instruction on quantifying the cost of providing security services; gives tips for under bidding and

competing against the big security companies; details tricks to minimize overhead and keep costs low and much, much more. Constantly updated and relevant, with the most recent update made in December of 2017, the book includes an array of helpful, must-have resources including a private security business plan and numerous free-to-use forms and templates.

In the second edition of this book, the origin, upkeep and latex harvest from the Hevea rubber tree are dealt with succinctly. New chapters have been included on Propagation Systems and Genetic Resources. The importance of Heterozygosis and Breeding is a new theme for the section on Breeding. A new chapter on Genomics and Molecular Breeding that focuses on the latest advancements on gene mapping, marker assisted selection and stimulation has been added. Lastly, 'textboxes' that highlight points and topics of significant interest are included in the new addition. Natural rubber has been an essential commodity not only for the tire industry but also for more than 50,000 products that holds elasticity as an attribute. The prime source of natural rubber worldwide is Hevea brasiliensis. Hevea rubber tree is an excellent example of how a soil-tree-atmosphere system can work in tandem. The retrieval of rubber through 'injuring' the tree on alternate days or once in three days or once in seven days, is indeed a unique arrangement followed universally that ensures income to the planter almost throughout the year. Every molecule of rubber is the end result of meticulous biochemical changes. Therefore the biology of Hevea rubber tree itself is a subject that aggregates science and technology for the realization of its industrial utility.

This edited volume reviews our past and present understanding of the ecology of Australian freshwater fishes. It compares patterns and processes in Australia with those on other continents, discusses the local relevance of ecological models from the northern hemisphere and considers how best to manage our species and their habitats in the face of current and future threats. In view of these challenges, the need for redress is urgent. The chapters are written by some of our foremost researchers and managers, developing themes that underpin our knowledge of the ecology, conservation and management of fish and fish habitats. For each theme, the authors formulate a synthesis of what is known, consider the need for new perspectives and identify gaps and opportunities for research, monitoring and management. The themes have an Australian context but draw upon ideas and principles developed by fish biologists in other parts of the world. The science of freshwater fish ecology in Australia has grown rapidly from its roots in natural history and taxonomy. This book offers an introduction for students, researchers and managers, one that the authors hope will carry Australian fish biology and resource management to new levels of understanding.

Intended to celebrate the first 10 years of Teachers and Writers Collaborative (the original organization which sent poets, novelists, and other artists into the schools on a regular basis), this book contains 29 articles, diaries, letters, manifestos, graphics, and memoirs. The book contains the following articles: (1) "Roots and Origins" (P. Lopate); (2) "Interview with Herbert Kohl" (H. Kohl and P. Lopate); (3) "Journal of a Living Experiment" (A. Sexton); (4) "Some Impressions Recorded as a Participant-Observer in the Summer Experimental Program in Deaf Education" (D. Henderson); (5) "The Use of Arts in the Education of Children Who Are Deaf" (K. Kennerly); (6) "Interview with Karen Kennerly" (K. Kennerly and P. Lopate); (7) "A Fable" (M. Rukeyser); (8) "Issues of Language" (P. Lopate); (9) "'The Voice of the Children' Diaries" (J. Jordan); (10) "Dreams" (J. Baumbach); (11) "A Class Novel" (L. Jenkin); (12) "A Grave for My Eyes" (A. Berger); (13) "Attitude toward Teachers and the Schools" (P. Lopate); (14) "Working on the Team" (K. Hubert); (15) "Luis, A True Story" (M. Willis); (16) "So Far Away" (T. Mack); (17) "Teachers and Writers and Me" (H. Brown); (18) "Combining Art and Dance" (S. Sandoval); (19) "Drawing" (R. Sievert); (20) "Teaching Art: Examining the Creative Process" (B. Siegel); (21) "Administering the Program" (P. Lopate); (22) "Two and a Half Years" (M. Hoffman); (23) "Interview with Kenneth Koch" (K. Koch and P. Lopate); (24) "Nine Years under the Masthead of Teachers and Writers" (R. Padgett); (25) "Latin Nostalgia" (M. Ortiz); (26) "Don't Just Sit There, Create" (W. Brown); (27) "A Love Letter to My Church" (D. Cheifetz); (28) "Pausing, and Looking Back" (A. Ziegler); and (29) "Conclusion" (P. Lopate). (SR)

This publication features a compendium of best practices tailored to the needs of the private security services entrepreneur. Readers are treated to a host of innovative concepts for managing and growing a private security business. Strategies include the science of post assignments, security officer archetypes, private security key performance indicators, client retention strategies, patrol route design and more. These concepts are described at length by JW Murphey, an author who founded and personally managed his own security firm. Murphey illustrates the concepts through the use of case studies that will hold the interest of the reader and inspire the implementation of these strategies and best practices.

This book addresses two main questions, namely how to prepare high-quality teachers in the 21st century and how the East and the West can learn from each other. It addresses the different challenges and dilemmas that eastern countries, especially China, and western countries are facing with regard to teacher education. We explore the question by examining teacher education research, practice and policy in different countries, identifying both common problems and country-specific challenges. We then try to find valuable experiences, theories and practice which can solve specific problems in the process of teacher education, also addressing how local and global factors impact it. In this regard, our approach does not strictly separate pre-service teacher education from teachers' in-service professional development, adopting an integrative perspective. Further, we believe the respective social and cultural contexts must also be taken into account. Lastly, we call for teachers' knowledge and individual character traits to be accounted for in the education of high-quality teachers.
