Review: Multi-Crew Experience. Multi-Crew Experience adds a co-pilot to almost any FSX aircraft, giving you an assistant while flying. This can be especially helpful when using more complex aircraft, and more realistic too. While not without flaws, reviewer, Meng Yu found it a nice addition to his sim experience.

primarily from flight manuals, but also includes elements taken from class notes, computer-based training, and operational experience. It is intended for use by initial qualification crewmembers, and also for systems review prior to recurrent training or check rides. The book is written in a way that organizes in one location all the buzz words, acronyms, and numbers the average pilot needs to know in order to get through qualification from an aircraft systems standpoint. The guide covers 777-200 and 777-300 series airplanes. The author is a retired Air Force Fighter pilot with flight experience in seven different aircraft types including the F-101, F-106 and F-15, and instructional experience in the T-33, F-101 and AT-38B aircraft. He also consulted on the acquisition and development of the F-22 and helped to write the F-22 operating manual. Transitioning to the airline world in 1990, he began writing and publishing transport category aircraft study materials and software guides. He holds type ratings in Boeing 727, 737, 757-767 and 777 aircraft as well as the Airbus A320 series aircraft. He has over 17,000 flight hours and has written seven titles which have sold a total of over 100,000 volumes. He retired with over 27 years work as an airline captain, certification as a flight engineer check airman, and management work in the area of managing operational specifications for a major airline.

This literal survival guide for new pilots identifies "the killing zone," the 40-250 flight hours during which unseasoned aviators are likely to commit lethal mistakes. Presents the statistics of how many pilots will die in the zone within a year; calls attention to the eight top pilot killers (such as "VFR into IFR," "Takeoff and Climb"); and maps strategies for avoiding, diverting, correcting, and managing the dangers. Includes a Pilot Personality Self-Assessment Exercise that identifies pilot "types" and how each type can best react to survive the killing zone.
