Prepared as per the latest syllabus prescribed by Medical Council of India, the key features of the book comprise: * Hand-drawn diagrams with labeling and spaces given for the students to draw the diagrams. * SLOs have been given for each slide which encourage self-learning. * All competencies given in the new curriculum, including basic ultrastructure competencies, have been included. This book is a must for every MBBS student for completing the histology practical.

Practical Manual on Oral Histology and Oral Pathology intends to provide students a diagrammatic overview of histological and histopathological features. This book is aimed at helping students to draw well labelled diagrams of oral histology and oral pathology in practical records and also to develop the interest of students in these subjects. Hand drawn diagrams with captions are included for better understanding and also to ease drawing the diagrams. Digitized diagrams of histology of oral and dental tissues and histopathology of oral lesions Covers most of the topics from the UG syllabus with descriptions of histological and histopathological features of each diagram Ease of understanding and drawing in practical records Characteristic features are highlighted in text Viva-voce questions with answers Additional Feature Complimentary access to full e-book

It is important to understand that forensic histopathology is quite different compared to the rest of histology. Diagnostic histopathology is largely an apprenticeship, learned through experience and by visual demonstration and example. It is of great importance in criminal cases, as the presentation of microscopic evidence improves the legal decision of Courts and promotes justice. This book focuses on the borderland between forensic pathology and forensic histology. Forensic pathologists also benefit from a realistic perspective with more than 300 full-colour micrographs. The main advantage of this book is the modern concept of histopathology, with inclusion of immunohistochemical techniques of great utility to forensic pathologists, forensic pathology fellows, pathologists who consult in forensic cases, pathology residents, autopsy pathologists, coroners and forensic investigators.

This title is a much needed update of Barbosa's self-published Manual of Basic Techniques in Insect Histology. It is a laboratory manual of 'traditional' and 'modern' insect histology techniques, completely revised using cutting-edge methodology carried out today and includes new immunohistochemical techniques not previously looked at. Insect Histology is designed as a resource for student and

professional researchers, in academia and industry, who require basic information on the procedures that are essential for the histological display of the tissues of insects and related organisms.

In this manual, author has included the molecular techniques, immunohistochemistry, cell blocks, and immunofluorescence along with the conventional techniques. For students' easy understanding; many figures, charts, diagrams and tables have been included. At the same time, the volume of the book has been restricted; so that students do not become overburdened during preparation of examination. [Ed.].
