~~Psychotherapy Research And Behavior Change The Master ...~~

The major focus of Behaviour Research and Therapy is an experimental psychopathology approach to understanding emotional and behavioral disorders and their prevention and treatment, using cognitive, behavioral, and psychophysiological (including neural) methods and models. This includes laboratory-based experimental studies with healthy, at risk and subclinical individuals that inform clinical application as well as studies with clinically severe samples.

Psychotherapy Research seeks to enhance the development, scientific quality, and social relevance of psychotherapy education, policy, and practice.

~~Psychotherapy Research: Vol 30, No 8—Taylor & Francis~~

Psychotherapy (also psychological therapy or talking therapy) is the use of psychological methods, particularly when based on regular personal interaction with adults, to help a person change behavior and overcome problems in desired ways. Psychotherapy aims to improve an individual's well-being and mental health, to resolve or mitigate troublesome behaviors, beliefs, compulsions, thoughts, or ...

~~Psychotherapy—Wikipedia~~

WHEREAS: psychotherapy (individual, group and couple/family) is a practice designed varyingly to provide symptom relief and personality change, reduce future symptomatic episodes, enhance quality of life, promote adaptive functioning in work/school and relationships, increase the likelihood of making healthy life choices, and offer other benefits established by the collaboration between client/patient and psychologist (American Group Psychotherapy Association, 2007; APA Task Force on ...
