These are the answers to the chapter-end questions in the 9 th edition of Chang's Chemistry.. If you have a different edition of the text, do not despair. Most of the questions have the same numbers, and where they are different, you should readily be able to decipher the answer(s) to match the question(s); they will not be off by very many numbers.

Chang's best-selling general chemistry textbook takes a traditional approach and is often considered a student and teacher favorite. The book features a straightforward, clear writing style and proven problem-solving strategies. It continues the tradition of providing a firm foundation in chemical concepts and principles while presenting a broad range of topics in a clear, concise manner. The tradition of "Chemistry" has a new addition with co-author, Kenneth Goldsby from Florida State University, adding variations to the 12th edition. The organization of the chapter order has changed with nuclear chemistry moving up in the chapter order.

This book is ideal for use in a one-semester introductory course in physical chemistry for students of life sciences. The author's aim is to emphasize the understanding of physical concepts rather than focus on precise mathematical development or on actual experimental details.

Subsequently, only basic skills of differential and integral calculus are required for understanding the equations. The end-of-chapter problems have both physiochemical and biological applications.

The Student Solutions Manual will have all the solutions to the even

numbered problems in the text. The style of the solutions will match worked examples in the text to help the student learn how to solve the problems.

The Study Guide includes learning goals, an overview, a review section with worked examples, and self-tests with answers.

Hailed by advance reviewers as "a kinder, gentler P. Chem. text," this book meets the needs of an introductory course on physical chemistry, and is an ideal choice for courses geared toward pre-medical and life sciences students.
