Here is the first comprehensive work in 25 years to lay out the technical problems involved in the "scaleup" that transforms an idea conceived in the lab into a full-scale chemical plant. From reaction engineering and filtration techniques to modeling and pilot plants, Scaleup of Chemical Processes shows how a lab discovery becomes a commercially viable product, and presents ways to expand existing processes, develop new ones, and save time and money getting a plant to commercialization.

(Page 1) Once a process is deemed commercially viable, engineering and business criteria determine the scaleup strategy, eventually arriving at full commercialization. Often constrained by cost and time, engineers must take calculated risks in bringing a process to industrial production. These risks must be evaluated in terms of financial consequences and compared with the inherent costs ...
