This 1999 reference grammar, written for advanced students of French, their teachers, and others who want a better understanding of the French language, combines the best of modern and traditional approaches. Its objective is not only practical mastery of the language, but familiarity with its structure. Taking into account modern linguistic research, Advanced French Grammar approaches the French language primarily through the study of syntactic structures, but without excessive emphasis on formalism. It provides a generous number of examples, based on the author's own experience of teaching French to English-speakers, to help

the student to understand the different meanings of apparently similar syntactic alternatives. The norms of 'correct expression' are given together with current usage and deviations, and appendixes provide information on the 1990 spelling reforms and on numbers. A substantial index of French and English words and of topics provides easy access to the text itself.

factor important de distinció social. B é fossen de procedència vegetal, mineral o animal, els tints van donar sempre l'« à nima » als tèxtils. Per això, el poder imperial romà, en alguns períodes de la seua història, va controlar amb normes legals de major o menor duresa l'ús de determinats colors obtinguts a partir de gasteròpodes marins. L'obra tracta extensament els aspectes econòmics i tècnics relacionats amb l'elaboració i comercialització de vestits i teles per a altres usos (veles, adorns de la llar, etc.). A partir de diversos punts de vista, entre els que s'inclouen les dades arqueològiques o les referències etnograficocomparatives, s'hi incideix en les etapes de preparació de les fibres tèxtils, en les formes d'elaboració dels teixits més complexos a través de la reconstrucció experimental, en el treball dels pescadors i manufacturers que elaboraven en tallers costaners el tint més
