Spirituality is an important aspect of occupational therapy theory and practice, yet it remains little understood. This timely book adds to the current debate by exploring the meaning of spirituality within occupational therapy and by outlining evidence which supports this area of practice. Beginning with the three stances surrounding spirituality for the common good and the theology of occupation, throughout its 10 chapters the book goes on to cover topics such as: Spirituality of caring; Theories of spiritual development; Definition of spirituality from occupational therapy literature; Differences between assessing spirituality and religion; Spirituality and ethics; Spiritual and cultural diversity in the occupational therapy clinic; Therapeutic self. By the end of the volume the reader will have the toolset required to consider spiritual concepts and their application to health principles. Occupational Therapy and Spirituality is written in an accessible format and is designed for occupational therapy and occupational science academics, researchers, and graduate students.

Spirituality and Health: Multidisciplinary Explorations examines the relationship between health/well-being and spirituality. Chap-lains and pastoral counsellors offer evidence-based research on the importance of spirituality in holistic health care, and practitioners in the fields of occupational therapy, clinical psychology, nursing, and oncology share how spirituality enters into their healing practices. Unique for its diversity, this collection explores the relationship between biomedical, psychological, and spiritual points of view about health and healing.

Spirituality is an important aspect of occupational therapy theory and practice, yet it remains little understood. This timely book adds to the current debate by exploring the meaning of spirituality within occupational therapy and by outlining evidence which supports this area of practice. Assessments in Occupational Therapy Mental Health, Second Edition proposes an exciting integrated approach to assessing multiple systems. the chapters in this text also present a thorough process for approaching client evaluation. In addition, the reasoning process is explored in a way that is helpful to occupational therapy students and practitioners at all levels.

Celebrating 100 years of the Occupational Therapy profession, this Centennial Edition of Willard & Spackman's Occupational Therapy continues to live up to its well-earned reputation as the foundational book that welcomes students into their newly chosen profession. Now fully updated to reflect current practice, the 13th Edition remains the must-have resource that students that will use throughout their entire OT program, from class to fieldwork and throughout their careers. One of the top texts informing the NBCOT certification exam, it is a must have for new practitioners.

This title is directed primarily towards health care professionals outside of the United States. For this second edition, all chapters have been updated and new concepts incorporated. It also contains a new chapter on paediatrics. The book continues to be the only one that provides the reader with both the theoretical underpinnings of client-centred practice as well as guidance on the practical application of this approach.

Forlagets beskrivelse: This book is meant to serve as a resource to occupational therapists, students, educators, researchers, colleagues from other disciplines, inside and outside Canada. It is intended to highlight the relationship between spirit, occupation and health, and to elaborate the role of spirituality in working with people with disabilities and working in health care settings. This book invites readers to be intentional in their use of spirituality, and to be explicit about how they are using terms, measures, interventions and outcomes. It suggests a number of conceptual and practical approaches. It acknowledges the cultural location of spirituality, attempting to ensure at all times that language and concepts are inclusive and welcoming. The book includes contributing authors from a number of disciplines, including chaplains, social workers, psychologists, theologians, and occupational therapists. It also draws on the literature from medicine, nursing, psychology, anthropology, theology and philosophy. By combining a variety of perspectives, this book offers a rich, textured, multidimensional view of spirituality, health and occupation. The book is set out in five parts: Introduction and context, Concepts and definitions, Conceptual models, Application of spiritual

concepts in practice, and Personal reflections and recommendations.

This revision of a well-loved text continues to embrace the confluence of person, environment, and occupation in mental health as its organizing theoretical model, emphasizing the lived experience of mental illness and recovery. Rely on this groundbreaking text to guide you through an evidence-based approach to helping clients with mental health disorders on their recovery journey by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

Look no further for the book that provides the information essential for successful practice in the rapidly growing field of gerontological occupational therapy! *Occupational Therapy with Aging Adults* is a new, comprehensive text edited by OT and gerontological experts Karen Frank Barney and Margaret Perkinson that takes a unique interdisciplinary and collaborative approach in covering every major aspects of geriatric gerontological occupational therapy practice. With 30 chapters written by 70 eminent leaders in gerontology and OT, this book covers the entire continuum of care for the aging population along with special considerations for this rapidly growing demographic.
