Commissioners use quality standards to ensure that high-quality care or services are being commissioned. Service providers use quality standards to monitor service improvements, to show that high-quality care or services are being provided and highlight areas for improvements. Health, public health and social care practitioners use audit and governance reports to demonstrate the quality of care, as described in a quality standard, or in professional development and validation.

four sets of Standards and are available on the Standards New Zealand website .

## **Services Standards | Ministry of Health NZ**

ISO 45001 Occupational health and safety management for hospitals and healthcare With its focus on strategic risk management, contractor management and looking after the mental wellbeing, as well as physical health of workers, it is clear that ISO 45001 provides an excellent framework to support hospitals and organizations within the healthcare sector.

## **Healthcare | BSI**

The Health and Care Standards have also been designed so that they can be implemented in all health care services, settings and locations. They establish a basis for improving the quality and safety of healthcare services by providing a framework which can be used in identifying strengths and highlighting areas for improvement.

## **Health and Care Standards - Health in Wales**

The new Health and Social Care Standards came into effect in April 2018. The new Standards replace the National Care Standards and are now relevant across all health and social care provision. They are no longer just focused on regulated care settings, but for use in social care, early learning and childcare, children's services, social work, health provision, and community justice.
