ALTERNATOR - STARTER TESTER Model 8600 1/2 HP 8601 1 HP

Hold the starter down with one foot. When you bench test the starter, it may move around and shoot some sparks. Holding it down with your foot prevents it from jumping around and causing injury. You can ask someone to help you. Have them hold the starter down securely with a booted foot while you perform the test.

OPERATION When the starting circuit is energized, battery current is applied to the starting motor terminal. Current flows through the field coils creating a strong magnetic field. At the same time, current flows through the brushes to the commutator, through the armature windings to ground. The magnetic force created in the armature combined with that created in the ' field windings, begins ...
